Auditor's Report

TO THE SHAREHOLDERS' OF IBN SINA PHARMA COMPANY (S.A.E.)

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of **Ibn Sina Pharma Company (S.A.E.)**, represented in the consolidated statement of financial position as of 31 December 2024, and the related consolidated statements of profit or loss, comprehensive income, changes in equity and cash flows for the year then ended and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Consolidated Financial Statements

These consolidated financial statements are the responsibility of the Company's Management, as Management is responsible for the preparation and fair presentation of the financial statements in accordance with Egyptian Accounting Standards and applicable Egyptian laws. Management responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. This responsibility also includes selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Egyptian Standards on Auditing and applicable Egyptian laws. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance that the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's professional judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on these consolidated financial statements.

2.1 Principles for the preparation of consolidated financial statements:

Compliance with standards and laws

The Company's Consolidated financial statements have been prepared in accordance with Egyptian Accounting Standards and applicable laws and regulations.

Basis of measurement

The Company's Consolidated financial statements have been prepared in accordance with the going concern assumption and the historical cost principle.

Currency of dealing and presentation

The Consolidated financial statements have been prepared and presented in Egytian pounds, which is the company's currency of dealing.

2.1 Principles for the preparation of consolidated financial statements - continued

Basis of combination

a)Subsidiaries

Subsidiaries are companies controlled by the Group. The Group controls the investee company when it is exposed to - or is entitled to - variable returns through its contribution to the investee company and has the ability to influence those returns through its authority over the investee company. The existence and impact of the currently exercising potential voting right or the right of transfer is taken into account when assessing whether the Group has control over another company. Affiliates are fully grouped from the date on which control is transferred to the group, and the aggregation is terminated when that control ends.

b)Transactions with non-controlling stake holders

Transactions with non-controlling interests that do not result in the holding company losing control are treated as transactions with the Group's equity holders.

Follow these steps when preparing consolidated financial statements:

- a) The book value of the holding company's investment in the subsidiary is excluded with the holding company's share in the equity in the subsidiary.
- b)Non-controlling interests are determined in the net profit or loss of the subsidiary during the period for which the financial statements are prepared.
- c)The rights of non-controlling interests in the net assets of the subsidiary are determined and presented in the financial statements separately from the shareholders' equity of the holding company.
 - (1) The amount of non-controlling interest rights on the date of original consolidation.
 - (2) The share of non-controlling interests in the change in equity from the date of consolidation.
- d) Balances, transactions, revenues and expenses exchanged between group companies are completely excluded.

The financial statements of the holding company as well as the financial statements of the subsidiary that are used in the preparation of the Consolidated financial statements are prepared on the same date.

Consolidated financial statements are prepared using standardized accounting policies for similar transactions and for events that take place in the same conditions.

Non-controlling interests in the consolidated financial position are presented under equity in a separate clause from the equity of the holding company's shareholders, and the share of non-controlling interests in the Group's profit or loss is presented separately.

Complementary notes to the consolidated financial statements As of 31 December 2024

<u>Translation of Financial Statements</u>

2.2 Summary of applicable accounting policies

Revenue recognition

Revenue from contracts concluded with customers is recognized when control of goods or services is transferred to the customer in an amount reflecting the consideration that the company expects to receive for those goods or services, Revenue is not recognized In case of doubts regarding the recovery of the consideration due, revenue is measured at the fair value of the consideration received or due in net taking into account the contractual terms specified after deducting any commercial discount or quantity orsales taxes or Fees The company recognizes the revenue as principal and not as an agent.

- Sale of goods

The revenue generated by the sale of goods is recognized at a point in time which is when the company transfers control to the buyer and this usually occurs when the goods are delivered.

- Logistics

Revenue resulting from the provision ofwarehousing logistics to customers is recognized over a period of time during the period of service provision to customers and revenue from transportation services is recognized to customers when the service is provided to them.

- Financing income

Interest income is recognized on an accrual basis Bast using the effective interest rate method The effective interest rate is the rate used to discount future cash payments expected to be repaid or collected during the expected life of the financial instrument or a shorter period of time if appropriate to fully equal the carrying amount of a financial asset or liability.

Lease Contracts

Company as a tenant:

<u>Lease Contracts Commitment:</u> On the date of the beginning of the lease contract, the company measures the lease commitment to the current value of the unpaid lease payments on that date using the interest rate implied in the lease if that rate can be easily determined and otherwise using the interest rate on the additional borrowing of the company and later the company increases the book amount of the obligation to reflect the interest on the lease obligation and the book amount is reduced to reflect the rental payments.

<u>Principal of right of use assets:</u> The principal of the usufruct right on the date of the beginning of the lease contract is measured by the amount of the initial measurement of the obligation of the lease in addition to the initial direct expenses, advance payments paid to the lessor, and the rental incentives received from the lessor (if any) are subtracted and the costs that the company will incur in dismantling and removing the asset and restoring the site where the asset is located to the original condition or restoring the asset itself to the required condition in accordance with the terms and conditions of the lease contract are added.

After the date of the beginning of the lease contract, the company shall measure the principal of the usufruct at cost minus any depreciation pool and any impairment loss complex and adjusted by any re-measurement of the lease obligation.

The depreciation of the usufruct asset shall be made from the date of the beginning of the lease contract until the end of the useful life of the asset if the lease transfer the ownership of the asset subject to the contract to the company at the end of the lease term or if the company will exercise the purchase option, otherwise the company shall depreciate the original usufruct from the date of the beginning of the lease contract to the end of the useful life of the usufruct asset or the end of the lease term, whichever is earlier.

2.2 Summary of applicable accounting policies - continued

Financial Instruments

A financial instrument is a contract that gives rise to a financial asset of an enterprise and a financial obligation or equity instrument of another entity.

a)Financial assets

Recognition and initial measurement

The classification of financial assets at initial recognition is based on the characteristics of the contractual cash flows of the financial asset and the growth of the company's business model to manage them, excluding customer balances and assets arising from contracts that do not contain a significant financing component. The Company measures the financial asset initially at its fair value plus transaction costs, in the case of a non-valued financial asset at fair value through profit or loss.

Subsequent measurement

For the purposes of subsequent measurement, financial assets are classified into four categories:

- Financial assets at depreciated cost (debt instruments).
- Financial assets at fair value through other comprehensive income with the recycling of accumulated profits or losses (debt instruments).
- Financial assets classified at fair value through other comprehensive income with no recycled profits or losses accumulated upon disposal (equity instruments).
- Financial assets at fair value through profits or losses.

Financial assets at depreciated cost (debt instruments)

This category is most relevant to the company The company measures financial assets at depreciated cost if the following two conditions are met:

- A financial asset is held within a business model for the purpose of holding financial assets in order to collect contractual cash flows.
- The contractual terms of the financial asset lead on specific dates to cash flows which are only principal amount payments and interest on the outstanding principal amount.

Financial assets are subsequently measured at depreciated cost using the effective interest rate method and are subject to impairment Profit and loss are recognized in the statement of profit or loss when an asset is excluded, adjusted or devalued.

The assets of the company valued at depreciated cost include customers, receivables and other debtors.

Derecognition of financial assets

A financial asset (or part of a financial asset or part of a company with similar financial assets, when appropriate) is essentially excluded (i.e., excluded from the company's statement of financial position) when:

- Expiry of the right to receive cash flows from the asset.
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "transfer through" arrangement and either:
 - (a) The company has substantially transferred all the risks and benefits of the asset.
 - (b) The company did not transfer or hold significantly all the risks and benefits of the asset but transferred control of the asset.

Complementary notes to the consolidated financial statements As of 31 December 2024

<u>Translation of Financial Statements</u>

2.2 Summary of applicable accounting policies - continued

<u>Financial Instruments - Continued</u> a)Financial Assets - Continued

Impairment of financial assets

The Company recognizes the provision for expected credit losses for all debt instruments not held at the highestvalue evidenced by gains or losses Expected credit losses are based on the difference between contractual cash flows due in accordance with the contract and all cash flows expected by the Company to be received, deducted approximately to the original effective interest rate Expected cash flows will include cash flows from the sale of retained collateral or other credit enhancements that are an integral part of the contractual terms.

For clients and assets arising from a contract, the Company applies the simplified approach to calculating expected credit losses. Therefore, the Company does not track changes in credit risk but instead recognizes a provision for loss based on expected credit losses over the life at the date of each report. The Company has established a provision matrix based on its historical experience in credit loss adjusted to customer forward-looking factors and the economic environment and would have been determined after depreciation, had the impairment loss not been recognized.

b)Financial Obligations

Initial recognition and measurement

Upon initial recognition, financial obligations are classified, as financial obligations at fair value through profit or loss, loans and facilities, suppliers or as derivatives classified as hedging instruments in effective hedging, where appropriate.

All financial obligations are initially recognized at fair value, and in the case of loans, advances and credit balances, costs directly related to the transaction are deducted.

The Company's financial obligations include suppliers and other credit balances, balances due to related parties, loans and facilities including bank overdrafts and other financial obligations.

Subsequent measurement

The measurement of financial liabilities is based on their classification as shown below:

Financial liabilities at fair value through profit and loss

Financial liabilities at fair value through profit and loss include financial liabilities held for the purpose of trading or determined upon initial recognition of fair value through profit and loss.

Financial obligations at amortized cost (loans and borrowings)

This is the category most relevant to the company. After the initial recognition, loans and advances are subsequently measured at amortized cost using the effective interest rate method. Profit and loss are recognized in the statement of profit or loss, when the recognition of obligations is demolished through the process of accruing the effective interest rate.

Amortized cost is calculated by taking into account any discount or premium upon acquisition and fees or costs that form an integral part of the effective interest rate. Effective interest rate amortization as financing costs is included in the statement of profit or loss. This category generally applies to loans and facilities.

Complementary notes to the consolidated financial statements As of 31 December 2024

<u>Translation of Financial Statements</u>
Originally Issued in Arabic

2.2 Summary of applicable accounting policies - continued

Financial Instruments - Continued

b)Financial obligations - Continued

De-recognition of financial obligations

The recognition of financial obligations is revoked when the obligation under the obligation is exempted, canceled or expires. When an existing financial obligation is replaced by another from the same lender on vastly different terms, or the terms of an existing obligation are materially modified, such exchange or adjustment is treated as an exclusion of the original obligation and recognition as serious obligation. The difference in the relevant book values is recognized in the statement of profit or loss.

Fixed assets

Fixed assets are shown at historical cost after deducting the accumulated depreciation and loss of impairment and this cost includes the cost of replacing a portion of fixed assets when such cost is realized and the conditions for recognition are met. Similarly, when comprehensive material improvements are made, their costs are recognized within the book value of fixed assets as a replacement if the recognition conditions are met and all other repair and maintenance costs are recognized in the statement of profit or loss when realized.

The depreciation of an asset begins when it is in the place and condition in which it becomes able to operate in the manner specified by management, and depreciation is calculated following the straight-line method according to the useful life of the asset as follows:

	1 ears
buildings	10-40
Machinery & Equipment	7-35
Transportation	5
Computer	3-40
Office Furniture & Equipment	5

Fixed assets are excluded upon disposal or when no future economic benefits are expected from their future use or sale. Any profits or losses arising when the asset is excluded in the statement of profit or loss in the period in which the asset was discarded are recognized.

The residual values of assets, their useful lives and methods of depreciation are reviewed at the end of each fiscal year.

The company ally determines in the history of each financial position whether there is an indication that a fixed asset has decayed when the carrying amount of the asset exceeds its redemption value, it is considered that there is impairment of the asset and therefore it is reduced to its redemption value and impairment losses are recognized in the statement of profits or losses.

Reimbursement of impairment losses is made only if there is a change in the assumptions used to determine the redemption value of an asset since the last impairment losses were recognized, and the refund of impairment losses is limited so that the carrying amount of the asset does not exceed its redemption value or exceeds the carrying amount that would have been determined (in net after depreciation) unless impairment losses are recognized for the asset in previous years. Refund for impairment losses is recognized in the statement of profit or loss.

Projects under constructions

Projects under implementation are the amounts spent for the purpose of establishing or purchasing fixed assets until they are ready for use in operation, then they are transferred to fixed assets, and projects under implementation are valued at cost after deducting impairment (if any).

Complementary notes to the consolidated financial statements As of 31 December 2024

<u>Translation of Financial Statements</u>
Originally Issued in Arabic

2.2 Summary of applicable accounting policies - continued

Intangible assets

Intangible assets acquired individually are initially recognized at cost.

After initial recognition, intangible assets are recognized at cost minus the depreciation pool and the impairment loss complex.

Intangible assets generated internally are not capitalized as an asset and expenses are recognized in the statement of profit or loss in the year in which the expenses were expended.

The shelf life of intangible assets is determined as age-specific or age-indefinite.

Intangible assets with useful lives determined on the economic life of the asset are depreciated, and an impairment measurement test is performed whenthere is an indication of the decay of the asset The depreciation and depreciation method of the intangible asset with a specific lifespan are reviewed at least at the end of each financial year.

Intangible assets are computer programs and licenses and are depreciated on a straight-line basis according to their lifespan.

Non-current assets held for sale

Non-current assets or (groups being disposed of) are classified as assets held for the purpose of sale if their book value is expected to be recovered primarily from a sale transaction and the probability of selling them is high, and they are measured in net book value or fair value minus expected selling costs, whichever is lower, in accordance with Egyptian Accounting Standard No. (32).

Inventory

Inventory is valued at cost using the moving average or net selling value method, whichever is lower, and the net selling value is determined on the basis of the expected price of the sale through the normal activity less the estimated cost of completion and the estimated cost needed to complete the sale.

The decrease in the value of inventory to net selling value and all inventory losses are recognized within the cost of sales in the income statement in the period inwhich the decrease or loss occurred and the return of the decrease in inventory resulting from the increase in net selling value is recognized in the income statement as a reduction in the cost of sales in the period in which the response occurred.

Investments in sister companies

A sister company is a company in which the investor, directly or indirectly, through subsidiaries of 20% or more, has the right to vote in the company in which he is invested, assuming that this investor has a strong influence. The initial recognition of the investment is the cost, provided that it is then adjusted by what occurs during the period following the acquisition of a change in the investor's share in the net assets of the investee, and the profits and losses of the investor include his share in the profits and losses of the enterprise for the investor, and the other comprehensive income includes the investor's share in the other comprehensive income of the investee. In the event of impairment in its value, the book value is reduced by the value of the impairment losses and charged to the income statement for each investment separately.

Related Party Transactions

The related parties are represented by the parent company and its subsidiaries, major shareholders, directors and senior management of the enterprise, and also represent companies controlled or subject to joint control or influence by those related parties, and the terms and pricing policies for transactions with related parties are approved by the Board of Directors in accordance with the procedures taken to approve those transactions.

Borrowing

Borrowing is initially recognized at the values received, and the amounts due within a year are classified within current obligations, unless the company has the right to postpone the repayment of the loan balance for a period of more than one year after the date of the financial position, the loan balance is displayed within the long-term liabilities.

Loans and interest-bearing borrowing are measured after initial recognition on the basis of amortized cost by the effective interest rate method. Gains and losses resulting from the disposal of liabilities as well as the depreciation process are included in the effective interest rate method in the profit or loss statement, the amortized cost is calculated taking into account any discount or premium when obtaining borrowing, fees or costs that are part of the effective interest rate and depreciation at the effective interest rate is included in the financing costs in the statement of profit or loss.

Borrowing cost

Borrowing costs directly related to the acquisition, creation or production of a qualifying asset that requires a long period of time to be processed for use for its intended purposes or for sale, are capitalized as part of the cost of the asset and other borrowing costs are charged as an expense in the period in which they materialize and borrowing costs are the interest and other costs that the company spends to borrow funds.

Complementary notes to the consolidated financial statements As of 31 December 2024

<u>Translation of Financial Statements</u>
Originally Issued in Arabic

2.2 Summary of applicable accounting policies - continued

Income taxes

Income tax is calculated in accordance with the Egyptian tax law.

Current Income Taxes

Income tax assets and liabilities for the current and prior periods are recognized according to the amount expected to be recovered or reimbursed to the tax authority.

Deferred income taxes

Deferred income tax is recognized by following the liability method on temporary differences between the recognized value of the asset or liability for tax purposes (tax basis) and its value included in the financial position (accounting basis) using the applicable tax rate.

Deferred income tax is recognized as an asset when there is an expectation that this asset can be used to reduce future tax profits, and the asset is reduced by the value of the partthat will not achieve a future benefit. Current and deferred tax is included as income or expense in the statement of profits or losses for the period, except for tax that results from a transaction or event in the same period or another period directly within equity.

Cash and cash equivalents

For the purpose of preparing the statement of cash flows, cash and cash equivalents include cash in the fund, current accounts in banks and term deposits that mature within three months or less from the date of acquisition, as well as bank balances - withdrawal on the exchangethat are repaid on demand andwhich are an integral part of the company's money management system.

Account and notes receivables and other debit balances

Account and notes receivables and other debit balances are recognized at amortized cost less impairment losses, impairment losses are measured by the difference between the book value of customers and the present value of expected future cash flows, impairment losses are recognized in the statement of profits or losses, and impairment losses are refunded in the period in which they occurred.

Suppliers, accrued expenses and other credit balances

Suppliers, accrued expenses and other credit balances are initially recognized at fair value excluding the direct cost of the transaction andare consequentially measured at amortized cost using the interest rate.

Obligations are recognized with values that will be paid in the future for goods and services received whether or not the company receives invoices from suppliers.

Dividends

Dividends are recorded as liabilities in the financial period in which the announcement is made.

Employees' share of profits

The share of employees in profits is recognized as dividends in the statement of change in shareholders' equity and as an obligation during the financial period in which the shareholders of the company approved this distribution, the company pays 10% of the cash dividends as a share of employees in profits not exceeding the total annual wages of the company's employees No obligation is recognized for the share of employees in profits in respect of undistributed profits.

Complementary notes to the consolidated financial statements As of 31 December 2024

<u>Translation of Financial Statements</u>
Originally Issued in Arabic

2.2 Summary of applicable accounting policies - continued

Provisions

Provisions are recognized when the company has a current legal or judgmental obligation as a result of a previous event, the provisions relate to an anticipated claim from certain third parties in relation to the company's activities. This is expected to require an outflow of economic resources to settle the obligation, with the possibility of a reliable estimate of the amount of the obligation.

In the case of using discount (present value), the increase in the provision due to the passage of time is recognized in the statement of profit or loss within the financing costs.

Social insurance and end-of-service benefits

The company provides contributions to the Authority for the period of pensions and social security and is calculated as a percentage of thesalaries of the employees The company's obligations are limited to these contributions, which are charged to expenses when due.

Foreign Currency Translation

Foreign currency transactions are initially recorded using the exchange rate prevailing on the transaction date.

Assets and liabilities of a monetary nature are translated into foreign currency using the exchange rate prevailing at the date of the financial position, all differences are included in the statement of profit or loss.

Non-cash assets and liabilities are translated into foreign currency and are measured at historical cost using the exchange rates prevailing at the date of first recognition.

Non-cash assets and liabilities are translated in foreign currency and are measured at fair value using the prevailing exchange rates on the date on which the fair value was determined.

Potential liabilities and potential assets

Contingent liabilities are not recognized in the financial position Disclosed unless the potential outflow of sources embodied for economic benefit is excluded The potential asset is not recognized in the financial statements but is disclosed when the inflow of the economic benefit is foreseen.

Expense

All expenses including operating expenses, general and administrative expenses and other expenses are recognized and included in the statement of profit or loss in the financial year in which such expenses were realized.

Cash flow statement

The cash flow statement is prepared following the indirect method.

2.3 Significant accounting judgments and estimates

Management is required in its application of the company's accounting policies to use judgments, estimates and assumptions to arrive at the book values of assets and liabilities when those values are not clear from other sources and these estimates and assumptions related to them depend on historical experience and other factors that are relevant and the actual results may differ from these estimates.

The estimates and assumptions related to them are reviewed on an ongoing basis, and the impact of adjustments on accounting estimates is recognized in the period in which those estimates are adjusted if the effect of the adjustment is limited only to that period, but if the adjustment affects both the current period and future periods, then the impact of those adjustments is recognized in the period in which the adjustment is made and future periods.

The following are the main judgments and estimates that materially affect the Company's financial statements:

Judgments

Revenue recognition

In making their judgment, the management considered the detailed criteria for the recognition of revenue as set out in EAS no.(48) Revenue from contracts with customers, in particular, whether we Company had transferred to the buyer the significant risks and rewards of ownership of goods.

Estimates

Expected credit losses, impairment in the value of, account and notes receivables and other debit balances

An estimate of the amount recoverable from customers, notes receivable and other debit balances is made when collection of the full amount is no longer expected. For individually significant amounts, the estimation is made on an individual basis. Amounts that are not individually significant, but which are past their due date, are assessed collectively and a provision is made according to the period of time that has passed since their due date based on expected credit losses.

Estimation of the net selling value of inventory

Inventory is stated at the lower of cost or net realizable value (NRV).

NRV for inventory is assessed by reference to market conditions and prices existing at the reporting date and is determined by the Company, based on comparable transactions, less estimated costs to complete the sale transaction.

Useful life of fixed assets and right of use assets

The Company is subject to income taxes in Egypt. Significant judgment is required to determine the total provision for current and deferred taxes. The Company establishes provision, based on reasonable estimates, for possible consequences of audits by the tax authorities in Egypt. The amount of such provision is based on various factors, such as experience of previous tax audits and different interpretations of tax regulations by the Company and the responsible tax authority. Such differences of interpretations may be on a wide variety of issues depending on the conditions prevailing in Egypt.

Deferred tax assets are recognized for unused accumulated tax losses to the extent that it is probable that taxable profits will be available against which the losses can be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Impairment of non-financial assets

The Company assesses whether there are any indicators of impairment for all non-financial assets at each reporting date. The non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. When value in use calculations are undertaken, management estimates the expected future cash flows from the asset or cash-generating unit and chooses a suitable discount rate in order to calculate the present value of those cash flows.

- On December 4, 2023, the Extraordinary General Assembly held on July 30, 2023 approved and decided to reduce the issued and paid up capital by EGP 28,000,000 by executing the treasury shares that the company purchased, which amounted to 112,000,000 shares (10% of the company's shares) at the nominal value of those shares, so that the issued and paid up capital becomes EGP 252,000,000 distributed over 1,008,000,000 shares with a nominal value of 25 piasters per share, and this has been noted in the commercial register on 18 December 2023.

The net treasury share reserve (losses) resulting from the sale and execution of treasury shares until 31 December 2024 will be 171,643,212 EGP.

Complementary notes to the consolidated financial statements As of 31 December 2024

<u>Translation of Financial Statements</u>
Originally Issued in Arabic

13-Reserves

A- Legal Reserve

As required by Egyptian Companies' law and the Company's articles of association, 5% of the profits of the year is transferred to the legal reserve until this reserve reaches 50% of the capital.

B- General Reserve

- On May 27, 2015 the company's extraordinary general assembly was held and it was agreed to increase the company's issued and paid-up capital to 24 million Egyptian pounds (twenty-four Egyptian pounds only) distributed over 240,000 shares (two hundred and forty thousand shares) instead of the amount of 20 One million Egyptian pounds (twenty million Egyptian pounds only) distributed over 200,000 shares (two hundred thousand shares). As a result of this increase, an issue premium amounted to 148 million Egyptian pounds (one hundred and forty-eight million Egyptian pounds only), Which is represented in the resulting difference between the nominal value of 40 thousand shares, which amounts to 100 Egyptian pounds (one hundred Egyptian pounds only) per share and the fair value of the share, which amounted to 3,800 Egyptian pounds (three thousand eight hundred Egyptian pounds only) at the date of this increase. This increase was subscribed to by 39,950 shares by the shareholder, the European Bank for Reconstruction and Development, and the rest for 50 shares by other shareholders, according to the approval of the Extraordinary General Assembly.
- Part of the issue premium was transferred to the general reserve to match the legal percentage of the capital and the remainder was transferred to the general reserve in accordance with Article 94 of the Companies Law (159) of 1981 and its amendments in accordance with Article (94).
- On March 5, 2017, the Extraordinary General Assembly decided to increase the company's authorized capital by an amount of EGP 144,000,000 to become EGP 168,000,000, as well as to increase the company's issued capital by EGP 144,000,000 to become EGP 168,000, in financing from the balance of the general reserve in 12/31/2016, so the balance of the general reserve on December 31, 2017 amounted to 3,079,334 Egyptian pounds.

Some loans are secured by all risk Insurance policies over the company's warehouses in favor of the banks. Financial commitment must also be fulfilled, as well as undertakings with some of the banks not to change the structure of the main shareholders or to transfer part of the company or sell the company assets without obtaining written approval from the bank, except for the sale of assets within the normal course of the company's activities. Additionally, profits should not be distributed until all due financial installments are paid.

B) AIM Healthcare Investment & Consulting Company (S.A.E)

The company was incorporated on 8 December 2020 and given that the company's first tax return is December 31, 2021 and therefore there are no tax claims or tax position for the company.

31- Commitments

The company's contract commitments from existing projects under construction that are not included in the financial statements at the date of the financial position amounted to EGP 27,711,388 (2023: EGP 17,282,261).

32- Contingent liabilities

In addition to the amounts recognized within the financial position, there are contingent liabilities uncovered by the company at 31 December 2024 amounted to EGP 3,449,773,514 (2023: EGP 2,173,977,562), represented in letters of credit of EGP 1,867,650,763 (2023: EGP 746,402,580) and letters of guarantee in the amount of EGP 1,582,122,751 (2023: EGP 1,427,574,982).

33- Financial Instruments

During the exercise of its activities, the Company is exposed to the following risks resulting from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

The company's financial instruments are financial assets (cash on hand and at banks, debtors, debit balances, due from related parties, accounts and notes receivable) as well as financial liabilities (creditors, credit balances, credit facilities, loans, suppliers, notes payable, lease liabilities and other long-term liabilities and due to related parties).

The overall responsibility for setting the company's risk management framework and following up on its implementation lies with the Board of Directors, and the Board of Directors is also responsible for developing and monitoring the implementation of the Company's risk management policies.

Risk management policies are developed with the aim of determining the risks facing the company, the limits of acceptable risk, the rules for monitoring those risks and ensuring that acceptable limits are adhered to.

Risk policies and regulations are reviewed periodically to reflect changes in market conditions and the company's activities, and the company aims, through its own training, management standards and procedures, to develop a disciplined control environment through which employees understand the role entrusted to them and their obligations.

The company's board of directors supervises how the management monitors compliance with risk policies and procedures, reviews the appropriateness of the risk system framework faced by the company, and the internal audit cooperates with the company's board of directors in carrying out a supervisory and control cycle, and the internal audit undertakes both the periodic review of risk management controls and procedures and submits a report on its results to management.

34- Important events

- On February 1, 2024, and in a direction contrary to the orientations of central banks around the world towards keeping interest rates unchanged, inflation in the pillars of the Egyptian economy led to the decision of the Monetary Policy Committee of the Central Bank to raise the return on deposit, borrowing and the official process rate by 200 points to reach 21.25%, 22.25% and 21.75%, respectively, with the aim of reducing inflation expectations and restricting monetary conditions to maintain the path of decline in inflation rates, as current developments indicate the continuity of pressures Inflation and its rise above its usual pattern, which is reflected in the inflation of both food and non-food commodities.
- On March 6, 2024, the Monetary Policy Committee decided at its extraordinary meeting to raise the rate of deposit and loan return and the price of the central bank's main transaction by 600 basis points to 27.25%, 28.25% and 27.75% respectively. The credit and discount rate was raised by 600 basis points to 27.75% in order to reduce the expected deviation of inflation from its target rate as well as the deviation of economic activity from its maximum productive capacity.
- This is in addition to expectations of continued pressure in light of fiscal consolidation measures, as well as continued supply-side pressures, as the higher rate of domestic liquidity growth than the historical average contributed to the escalation of inflationary pressures.

35- New publications and amendments to Egyptian accounting standards:

- October 23, 2024, the Prime Minister issued Decree No. 3527 of 2024, a new accounting standard No.
 51 of the Egyptian Accounting Standards. This standard applies to the independent and consolidated financial statements of any entity or enterprise whose restriction currency is in an economy with excessive inflation.
- In accordance with paragraph (6) of the Standard, a decision will be issued by the Prime Minister or by his or her delegate setting the date of start and end of the period or financial periods during which this criterion must be applied when the currency of registration is the local currency.
