Limited review report on the consolidated interim financial statements

To: The Board of Directors of Citadel Capital Company (S.A.E.)

Introduction

We have reviewed the accompanying consolidated interim statement of financial position of Citadel Capital Company (S.A.E.) and its subsidiaries (together the "Group") as at 30 September 2020 and the related consolidated interim statements of profit or loss, comprehensive income, changes in equity and cash flows for the nine-month period then ended, and notes comprising a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of these consolidated interim financial statements in accordance with Egyptian Accounting Standards. Our responsibility is to express a conclusion on these consolidated interim financial statements based on our limited review.

Scope of limited review

Except as explained in the Basis for qualified conclusion paragraph, we conducted our limited review in accordance with Egyptian Standard on Limited Review Engagements 2410, "Limited Review of Interim Financial Statements Performed by the Independent Auditor of the Entity". A limited review of consolidated interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other limited review procedures. A limited review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these consolidated interim financial statements.

Basis for qualified conclusion

As described in note (30) to the accompanying consolidated interim financial statements, the Group's management assessed that it had lost control over Africa Railways Limited and its subsidiaries (the "ARL Group") as at 31 December 2018 in light of the issuance of a court order during 2018 to liquidate the ARL Group. As a result, it deconsolidated the ARL Group as at 31 December 2018 and consequently recognized a gain in the consolidated statement of profit or loss of EGP 3.9 billion for the year then ended.

In view of the ambiguity surrounding the timing of the loss of control over the ARL Group, attributed to the commencement of its liquidation, we were unable to obtain sufficient appropriate audit evidence or perform any alternative procedures to determine whether the Group did indeed cease to have control over the ARL Group during the year ended 31 December 2018 or whether the control was actually lost during the year ended 31 December 2019.

Further, Group management was not able to obtain any recent financial information in respect of the underlying subsidiaries of the ARL Group. Accordingly, the Group's management based the deconsolidation during 2018, referred to above, on the latest information available to it as amended by its own assumptions and estimates of transactions it believed to have occurred after the date of that information. Consequently, we were unable to obtain sufficient, appropriate audit evidence to determine the reliability of the financial information of ARL Group used in the deconsolidation process and which led to the recognition of the gain of EGP 3.9 billion recorded in the consolidated statement of profit or loss during the year ended 31 December 2018.

To: The Board of Directors of Citadel Capital Company (S.A.E.)

Page 2

As a result of this unresolved matter, we were therefore, unable to determine whether adjustments might be required to these amounts that could have an impact on the comparability of the current period figures with the corresponding figures for the consolidated interim statements of profit or loss, comprehensive income, changes in equity and cash flows for the nine-month period ended 30 September 2019.

Qualified conclusion

Except for any possible adjustments to the corresponding figures in the consolidated interim financial statements that we might have become aware of had it not been for the situation described above, based on our limited review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial statements do not present fairly, in all material respects, the financial position of the Group as at 30 September 2020, and of its financial performance and its cash flows for the nine-month period then ended in accordance with Egyptian Accounting Standards.

Emphases of matter

Without further qualifying our conclusion, we draw attention to the following matters:

- As described in note (29)(a)(iii) to the consolidated interim financial statements, the Group incurred a loss of EGP 6.2 billion in the nine-month period ended 30 September 2020 and as of that date its current liabilities exceeded its current assets by EGP 23.9 billion and it had accumulated losses of EGP 18.9 billion. In addition, as of that date, the Group was in breach of some of its debt covenants and had defaulted in settling the loan instalments on certain of its borrowings on the respective due dates. These conditions set out in note (29)(a)(iii) indicate the existence of material uncertainty that may cast significant doubt about the Group's ability to continue as a going concern.
- Note (3)(e)(i) to the consolidated interim financial statements sets out the key considerations and critical accounting judgements applied by management in concluding that Egyptian Refining Company ("ERC") should be consolidated by the Group. Should these judgements change, the Group may need to deconsolidate ERC.

Group structure

1. Introduction

Citadel Capital Company (S.A.E). "The Holding Company" was incorporated in 2004 as an Egyptian joint stock company under Law No. 159 of 1981. It was registered in the commercial registered under number 11121, Cairo on 13 April 2004. The Holding Company's term is 25 years as of the date it is entered in the commercial registered and can be renewed. The Holding Company is registered in the Egyptian Stock Exchange.

The Holding Company's head office is located in 1089 Nile Corniche, Four Season Nile Plaza, Garden City, Cairo, Egypt.

The purpose of the Holding company and its subsidiaries (the Group) is represented in providing consultancy in financial and financing fields for different companies and preparing and providing the feasibility studies in the economical, engineering, technological, marketing, financial, administrative, borrowing contracts arrangements and financing studies for projects and providing the necessary technical support in different fields except legal consultancy, in addition to working as an agent of companies and projects in contracting and negotiations in different fields and steps especially negotiations in the management contracts, participation and technical support, and managing, executing and restructuring of projects.

The Holding company may have an interest or participate in any way with companies and others that carry out work similar to its work or that may help it to achieve its purpose in Egypt or abroad, and it may also merge with the previous bodies, buy or join them according to the provisions of the law and its executive regulations.

The Extraordinary General Assembly of the Holding company decided on 20 October 2013 to approve the Company's conditions of work in accordance with the Capital Market Law and its Executive Regulations as a company engaged in the purpose of establishing companies and participating in increasing the capital of companies in accordance with the provisions of Article 27 of the Capital Market Law and Article 122 of its executive regulations. The necessary legal procedures have been initiated after completion of all necessary legal procedures to increase the company's capital until the situation is reconciled according to the new capital of the company.

The Holding Company is owned by Citadel Capital Partners Ltd. Company (Malta) by 23.49%.

The consolidated financial statements were authorised to be issued by the Holding company's Board of Directors on 10 December 2020.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

2. Significant changes in the current reporting period

The existence of novel coronavirus (Covid-19) was confirmed in early 2020 and has spread across the whole world, causing disruptions to businesses and global economic activity in general. The extent and duration of such impacts remain uncertain and dependent on future developments that cannot be accurately predicted at this time, such as the transmission rate of the coronavirus and the extent and effectiveness of containment actions. The restrictions resulting from the COVID-19 pandemic are impacting the local and the entire global economy. However, the Group are delivering growth and proving resilient in the face of Covid-19 supported by the diversification strategy of its portfolio.

The situation differs greatly from region to region. Whereas some countries are keeping their borders closed, restricting the flow of goods and imposing lockdowns, others are already starting to lift restrictions in areas with low rates of new infections. The global market conditions have affected market confidence and consumer spending patterns locally and globally. Though management expectations for the Group's different sectors post COVID-19 remains positive given its strategic importance.

The Group has reviewed its exposure to COVID-19 related and other emerging business risks and believe that upon the resolution of the COVID pandemic the Group will accelerate growth trends across the portfolio and that due to the diversity of the group's portfolio.

The first nine months of 2020 marked a milestone for the Group with the full operation of Egyptian Refining Company (ERC) (Subsidiary), which increased the revenue by 16 billion EGP compared to same period in last year.

At TAQA Arabia, while the slowdown in tourism impacted the performance of its power division, the gas business continued to deliver impressive results and meet its operational targets.

The easing restrictions related to COVID-19 in Q3 2020 also boded well for international trade, subsequently supporting improved performance at our mining operations, where both ACCM and GlassRock witnessed growth in export volumes.

The Group is also benefiting from the Egyptian government's stimulus plan and relief measures in response to the Covid-19, including energy price cuts, interest rate cuts and a six-month deferral on debt payments. These relief measures will further support the Group' liquidity position and leading to significant reductions in interest expense and the Group's variable costs. Additionally, given the recent macroeconomic situation and the impact of COVID-19, in particular with regards to oil market volatility, ERC is currently negotiating to reached a debt-deferral agreement with its senior lenders includes, but not limited to, a senior loan principle deferral to December 2020, the interest payments that due in June 2020 were paid as scheduled. However, our ability to be predictive is quite uncertain, since the magnitude, duration and speed of the global pandemic is uncertain and may change the Group's plans, and accordingly the Group may revisit its plans, and negotiate with the senior lenders for further deferral of the loan principal by end of December 2020. Also, the Group management has reached advanced stages of negotiations over the restructuring of debts at the holding level and at a number of its subsidiaries in cement, mining and transportation sectors, which should result in debt reduction of other subsidiaries' loans are anticipated to be restructured onto a longer term basis and negotiations are underway in this regard with the lenders.

**CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES**
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Significant changes in the current reporting period (continued)

Management is closely monitoring the COVID-19 situation and is in constant communication with leadership teams across its subsidiaries to identify risks posed by the pandemic and develop appropriate measures to ensure the health and safety of its employees and business continuity.

The Group has reviewed and assessed the COVID impact on the financial performance and position and its impact on the subsidiaries' assets through the impairment test performed on different segment levels and the management concluded that there is no material impact on the net book value of the Group assets.

3. Interests in other entities

3(a) Material subsidiaries

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Interests in other entities (continued)

3(d) Transactions with non-controlling interest

During the nine months period ended 30 September 2020, the Group sold 0.3% from its percentage of the issued shares of Orient Investment Properties Ltd and sold 7.27% from its percentage of the issued shares ASEC Company for Mining.

3(e) Significant judgements

(i) Consolidation of Arab Refining Company – S.A.E “ARC” and its subsidiary Egyptian Refining Company – (S.A.E) (“ERC”)

In determining the appropriate accounting treatment for ERC, management applied significant judgment. If management’s judgments were to change, this would result in the deconsolidation of ARC and its subsidiary ERC. ERC currently has consolidated assets and liabilities impacting the consolidated financial position amounting to approximately EGP 64.5 billion and EGP 48.5 billion respectively as at 30 September 2020 and with a consolidated loss of EGP 5.3 billion for the nine-month period . The primary assets and liabilities making up these totals are represented in the fixed assets amounted EGP 60 billion, Trade and other payables amounted to EGP 2.8 billion and loans liabilities amounted to EGP 40.7 billion.

(ii) Control over Egypt Refining Company (ERC)

ERC was set up for the purpose of constructing and operating refinery project and aim to provide benefits for its stakeholders such as debt and equity financiers in addition to cost savings to Egyptian General Petroleum Corporation (EGPC). The Group was involved with the set up and design of ERC.

Management are of the view that the Group has control over ERC by virtue of shareholders agreements, exposure, or rights, to variable returns from its involvement with ERC; and can use its control over ERC to affect the amount of the Group’s variable returns. Management consider that the relevant activities that most significantly affect variable returns will not be derived during the construction phase of the project but rather during the operational phase.

The Group is exposed to variable returns with the involvement with ERC. Variable returns consist of equity returns, fees for service contracts, guarantee fees incurred by the Group on behalf of ERC and exposure to reputational risk.

In August 2019 ERC started its pre-completion operations which resulted supplying EGPC with LPG, reformat, JET fuel, Diesel and Fuel Oil products

On 29 February 2020 the contractor has sent a notification to ERC that the contractor has attained initial acceptance and requested to issue the initial acceptance certificate as the contractor completed the requirements set forth in contracts Including but not limited to the following:

- All unit’s performance test, plant performance test and plant reliability test have been successfully completed
- The delay liquidated damages is comprehensively negotiated between the parties in good faith while reserving contractor’s right and are to be settled through a settlement agreement in due course.

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Interests in other entities (continued)

Also, the operation phase started at the beginning of the current period, considering the year 2020 marks the first full operational fiscal year for the ERC project according to the clauses in ERC Deed of Shareholders Support. The Group shall always procure that and prior to the project completion it shall have control over ERC's decision-making, management and operations. Contractually with these clauses, the Group has the full ability to direct the relevant activities of ERC until two years post to the project completion terms have been met.

Whilst Egyptian General Petroleum Corporation (EGPC) and ERC have entered into several contractual arrangements, which will be effective during the operational phase, these have been assessed and do not provide Egyptian General Petroleum Corporation (EGPC) with the control to direct the relevant activities of ERC.

As soon as the two-year period ends, the Group's management concluded that the non-controlling interest rights will be insignificant and therefore the Group continue to have the control over the ERC.

The Group has appointed the key management personnel of ERC such as the Chief Executive Officer and Chief Financial Officer and the majority of the board of directors are Group appointments.

The Group has the ability to use the power to affect the variable returns and is not acting in an agent capacity.

3(f) Interest in associates

	Place of business / country of incorporation	Shareholding %		Carrying amount	
		30 September 2020	31 December 2019	30 September 2020	31 December 2019

5. Hyper-inflationary economies

During 2018, the Group adopted IAS 29, "Financial Reporting in Hyperinflationary Economies". The Sudanese economy have been considered to be hyperinflationary. Accordingly, the results, cash flows and financial position of the Group's subsidiary, Takamul for Cement Company have been expressed in terms of the measuring unit current at the reporting date.

5(a) Significant judgement

The Group exercises significant judgement in determining the onset of hyperinflation in countries in which it operates and whether the functional currency of its subsidiaries, associates is currency of a hyperinflationary economy.

Various characteristics of the economic environment of Sudan are taken into account. These characteristics include, but are not limited to, whether:

- the general population prefers to keep its wealth in non-monetary assets or in a relatively stable foreign currency;
- prices are quoted in a relatively stable foreign currency;
- sales or purchase prices take expected losses of purchasing power during a short credit period into account;
- interest rates, wages and prices are linked to a price index;
- and the cumulative inflation rate over three years is approaching, or exceeds, 100%.

Management exercises judgement as to when a restatement of the financial statements of a Group entity becomes necessary. Following management's assessment, the Group's subsidiary in Sudan, Takamul for Cement has been accounted for as entities operating in hyperinflationary economies.

The results, cash flows and financial positions of Takamul for Cement have been expressed in terms of the measuring units current at the reporting date. The inflation adjusted financial information, are stated in terms of current Sudanese Pound at the reporting date using Consumer Price Index (CPI) for Sudanese supplied by the Central Statistical Office. The general price indices used in adjusting the results, cash flows and the financial position of Takamul for Cement set out below is based on the Consumer Price Index (CPI) published by Sudan Bureau for Statistics. Management applied the below conversion factors as fixed assets additions took place during all of these years.

<u>Year</u>	<u>Index</u>	<u>Conversion factor</u>
2020-Q3	6,745.65	1.72
2019	2,291.21	1.21
2018	1,365.05	1.23
2017	861.5	1.76
2016	688.37	2.25
2015	527.59	2.74
2014	468.6	3.24
2013	372.9	4.29
2012	262.79	6.14
2011	181.94	8.15

(i) Classification as trade and other receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. If collection of the amounts is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets. Trade receivables are generally due for settlement within 60 days and therefore are all classified as current. The Group's impairment and other accounting policies for trade and other receivables are outlined in notes 29(j)(iv) and note 29(n) respectively.

(ii) Other receivables

These amounts are generally arisen from transactions outside the usual operating activities of the Group. No interest is usually charged on other receivables. The non-current other receivables are due and payable within three years from the end of the reporting period.

(iii) Fair value of trade and other receivables

Due to the short-term nature of the current receivables, their carrying amount is considered to be the same as their fair value. For the majority of the non-current receivables, the fair values are also not significantly different to their carrying amounts.

(iv) Impairment and risk exposure

Information about the impairment of trade and other receivables, their credit quality and the Group's exposure to credit risk, foreign currency risk and interest rate risk can be found in note 27(c) and note 27(b).

(v) Significant estimates

The loss allowances for financial assets are based on assumptions about risk of default and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

6(b) Available-for-sale financial assets

	30 September 2020	31 December 2019
Non-current assets		
Unlisted equity securities	12,283	12,314
	12,283	12,314

(i) Classification of available for sale financial assets

Investments are designated as available-for-sale financial assets if they do not have fixed maturities and fixed or determinable payments, and management intends to hold them for the medium to long-term. Financial assets that are not classified into any of the other categories (at FVPL, or loans and receivables) are also included in the available-for-sale category.

The financial assets are presented as non-current assets unless they mature, or management intends to dispose of them within 12 months of the end of the reporting period.

(ii) Impairment indicators for available for sale financial assets

An equity security is considered to be impaired if there has been a significant or prolonged decline in the fair value below its cost. See [note 29\(j\)\(iv\)](#) for further details about the Group's impairment policies for financial assets.

(iii) Amounts recognised in profit or loss and other comprehensive income

During the period, the following gain (losses) were recognised in profit or loss and other comprehensive income.

	30 September 2020	31 December 2019
Gain (losses) recognised in other comprehensive income (note 8(c))	750	(2,079)
	750	(2,079)

(iv) Fair value, impairment and risk exposure

Information about the methods and assumptions used in determining fair value is provided in [note 6\(i\)](#).

6(c) Financial assets at fair value through profit or loss

	30 September 2020	31 December 2019
Current assets		
Egyptian listed equity securities	4,185	3,010
	4,185	3,010

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

(i) Classification of financial assets at fair value through profit or loss

The Group classifies financial assets at fair value through profit or loss if they are acquired principally for the purpose of selling in the short term, i.e., are held for trading. They are presented as current assets if they are expected to be sold within 12 months after the end of the reporting period; otherwise they are presented as non-current assets. See [note 29\(j\)](#) for the Group's other accounting policies for financial assets.

(ii) Amounts recognised in profit or loss

Changes in fair values of financial assets at fair value through profit or loss are recorded in "Other operating expenses" in consolidated interim statement of profit or loss (2020 – gain of EGP (1,175); 2019 – loss of EGP 1,405). ([note 13](#))

(iii) Risk exposure and fair value measurements

Information about the Group's exposure to price risk is provided in [note 27\(b\)\(ii\)](#). For information about the methods and assumptions used in determining fair value please refer to [note 6\(i\)](#).

6(d) Cash at bank and in hand

	30 September 2020	31 December 2019
Current assets		
Time deposits	400,402	398,263
Banks - current accounts	1,993,573	1,857,051
Cheques under collection	3,917	15,578
Letters of guarantee	25,526	37,885
Cash on hand	10,598	6,565
Treasury bills	2,902,523	1,352,472
	5,336,539	3,667,814
Impairment on Banks accounts (Note 13)	(36,287)	-
EAS 47 adoption (Note 29(a)(v))	(58)	-
	5,300,194	3,667,814

(i) Reconciliation to cash flow statement

The above figures reconcile to the amount of cash shown in the statement of cash flows at the end of the financial period as follows:

	30 September 2020	31 December 2019
Balances as above	5,300,194	3,667,814
Restricted cash	(664,844)	(680,885)
Cash included in the assets of the disposal group	2,754	-
Treasury bills	(340,917)	(1,187,945)
Balances per consolidated interim statement of cash flows	4,297,187	1,798,984

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

(ii) Classification as cash equivalents

Term deposits are held with banks and presented as cash equivalents if they have a maturity of nine months or less from the date of placement and are repayable with 24 hours' notice with no loss of interest. Treasury bills included under Cash and cash equivalent have original maturities of not more than three months from the date of acquisition, are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. See [note 29\(o\)](#) for the Group's other accounting policies on cash and cash equivalents.

(iii) Restricted cash

The cash and cash equivalents disclosed above and in the statement of cash flows include EGP 25.5M (2019 – EGP 38M), which are placed with banks as cash cover for letters of guarantee issued in favour of the Group, EGP 383M in time deposits that are held by HSBC bank as collateral against the loan granted to Citadel Capital for International Investments on December 24, 2019 for a period of 6 months, EGP 256M (2019 – EGP 260M) that are held by HSBC bank as collateral against the loan. The restriction will be released upon the full repayment of EIB loan and therefore are not available for general use by the entities within the Group.

The average effective interest rate on deposits at 30 September 2020 is 10.25 % (2019 – was 10 %). Time deposits and current accounts with banks are placed with local banks under the supervision of CBE.

(iv) Treasury bills

The Treasury bills disclosed above and in the consolidated interim statement of cash flows include EGP 340 Million (2019 – EGP 1.2 Billion) with maturity date more than three month but less than one year.

6(e) Trade and other payables

	30 September 2020			31 December 2019		
	Current ***	Non-current	Total	Current **	Non-current	Total
Trade Payables *	5,889,741	262,416	6,152,157	5,607,034	221,860	5,828,894

Advances from customers	257,482	-	257,482	151,201	-	151,201
Deferred revenue	238,186	-	238,186	203,970	-	203,970
Tax authority payable	1,108,719	-	1,108,719	1,082,670	-	1,082,670
Social insurance authority	91,802	-	91,802	84,104	-	84,104
Other credit balances**	680,370	65,878	746,248	807,372	4,932	812,304
Total trade and other payables	12,142,202	328,294	12,470,496	10,679,343	226,792	10,906,135

* Current Trade payables are unsecured and are usually paid within 60 days of recognition.

* This balance includes the amount of EGP 542 million (2019: 552 million) that is payable to Egyptian General Petroleum Corporation (EGPC) represents in purchases of unrefined petroleum products.

**CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES**
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

** According to the loan agreement with one of the Group's shareholder , Citadel Capital for international investment limited "CCII" Company (subsidiary of the group) agreed to grant a put option over part of one of its subsidiary's equity which permit the holder to put their shares in the subsidiary back to the group at the price specified in the agreement on specified dates.

The amount that may become payable under the option if exercised is initially recognised at the present value of the redemption amount and accounted for within the other credit balances with a corresponding charge directly to equity. The amounts charged to equity is recognised separately as written put options over equity reserve in the equity.

The liability is subsequently accreted through finance charges up to the redemption amount that is payable at the date at which the option first becomes exercisable. In the event that the option expires unexercised, the liability is derecognised with a corresponding adjustment to equity.

*** The carrying amounts of the current trade and other payables are considered to be the same as their fair values, due to their short-term nature.

6(f) Derivatives financial instruments

	30 September 2020	31 December 2019
Interest rate swap contracts (ERC)	(672,132)	(257,893)
Interest rate swap contracts (Taqa)	(120,564)	(72,463)
Call option agreement	(4,456)	-
	(797,152)	(330,356)

(i) Interest rate swap contracts (ERC)

Egyptian Refining Company (a subsidiary) has entered into six Interest Rate Swap transactions with the following parties;

- Standard Chartered Bank.

- HSBC Bank Middle East Limited.
- KFW IPEX-Bank GMBH.
- Mitsubishi UFJ Securities International PLC.
- Credit Agricole Bank

The main terms of the transactions except for Credit Agricole are as follows :

Trade date: June 25, 2012.

Effective date: July 3, 2012.

Termination date: December 20, 2024.

Fixed rate paid by the company is 2.3475%.

Floating rate paid by bank is USD - LIBOR - BBA semi-annual.

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

The main terms of the transactions for Credit Agricole:

Trade date: January 24, 2018

Effective date: February 28, 2018

Termination date: June 22, 2020

Floating rate paid by bank is USD – LIBOR – BBA 6 months (Cap Rate) is 2.35%

Payment date: Semi – annually on 19th commencing 19th – June -2018 till termination date

Maximum estimated amount under these transactions are:

- US\$789,445k by Standard Chartered Bank.
- US\$450,971k by Societe General Corporate & Investment Banking.
- US\$435,971k by HSBC Bank Middle East Limited.
- US\$107,759k by KFW IPEX - Bank GMBH.
- US\$189,467k by Mitsubishi UFJ Securities International PLC.

Maximum notional amount covered under Credit Agricole are US\$ 840,000,000 from the effective date till 22-June-2020

The following table summarizes the hedging assets / (liabilities) movement:

	30 September 2020	31 December 2019
Interest rate swaps – cash flow hedges		
Balance at 1 January	(257,893)	212,556
Change in fair value	(422,917)	(470,363)
Forex	8,678	(86)
Ending balance	(672,132)	(257,893)

The outstanding Interest Rate Swap (IRS) contracts at 30 September 2020 amounted to EGP 13.5 billion (31 December 2019: EGP 14.7 billion) equivalent to US \$ 838.3 million (31 December 2019: US \$919.7 million).

The IRS fixed interest rates are 2.3475% and the floating rates are predominantly linked to LIBOR as determined at designated maturity of nine months.

The Hedging effectiveness test conducted at 30 September 2020 indicated that the IRS was highly effective, and accordingly the change in fair value of the IRS was recognised in other comprehensive income.

(ii) Interest rate swap contracts (Taqa)

TAQA Solar company (a subsidiary) has entered into a finance agreement with International finance Corporation to obtain a loan to finance the Solar energy project.

The main terms of the transactions are as follows:

Effective date: 2 July 2018

Termination date: 15 Jan 2032.

Fixed rate paid by the company is 3.417%.

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

The following table summarizes the hedging (liabilities) movement:

	30 September 2020	31 December 2019
Interest rate swaps – cash flow hedges		
Balance at 1 January	(72,463)	-
Change in fair value	(48,101)	(72,463)
Ending balance	<u>(120,564)</u>	<u>(72,463)</u>

(iii) Call option agreement

According to the call option agreement signed between the Group and one of its shareholders , the agreement grants the shareholder the right but not the obligation to buy 2% of one of Citadel Capital Company subsidiaries' issued capital (the Call Option") which can only be exercised upon the failure of citadel capital international investment limited (a subsidiary of the Group) to repay the borrowed principle on maturity date.

6(g) Financial liabilities at fair value through profit or loss

	30 September 2020	31 December 2019
Opening balance at 1 January	364,592	355,296
Financial liability fair value change through profit or loss	20,554	36,238
Interest expense	10,404	12,559
Foreign currency translation differences	(6,906)	(39,501)
	<u>388,644</u>	<u>364,592</u>

On 31 December 2014, Citadel Capital for International Investment "CCII" Company and Citadel Capital Company S.A.E. entered into swap agreement with former shareholder, through which CCII will acquire the former shareholders shareholding in one of the Group platforms against subscription in share capital increase of Citadel Capital Company.

The same parties on 31 December 2014 have commercially agreed, and Citadel Capital Company S.A.E. thus guarantees, that the disposal by the Company of the investment shares shall achieve to the former shareholders a specific target cash return of USD 25,378 (Target Return), to be unconditionally made available to the former shareholder no later than the longstop date on 30 March 2017. Therefore, the Group management at the end of each reporting period is measuring the fair value of Citadel Capital Company capital increase by reference to quoted market price of the share and measure the outstanding liability to reach the agreed target return.

Fair value of the outstanding liability recognized as of 30 September 2020 is US \$24,754 (31 December 2019: US \$22,801).

	3,582,200	3,119,137	

The carrying amounts of financial and non-financial assets pledged as security for current and non-current borrowings are disclosed in [note 7\(a\)\(iv\)](#).

(ii) Compliance with loan covenants

The Group has not complied with all of the financial covenants of its borrowing facilities during the nine months ended 30 September 2020 and 31 December 2019 reporting period, see [note 6\(h\)\(i\)](#) for details.

(iii) Fair value

The fair values are not materially different to their carrying amounts, since the interest payable on those borrowings is either close to current market rates or the borrowings are of a short-term nature.

(iv) Risk exposures

Details of the Group's exposure to risks arising from current and non-current borrowings are set out in [note 27\(d\)](#).

CITADEL CAPITAL COMPANY (S.A.E).

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

6(i) Recognised fair value measurements

(i) Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into the three levels prescribed under EAS 45 "Fair value measurement". An explanation of each level follows underneath the table.

Recurring fair value measurements					
At 30 September 2020					
Financial assets	Notes	Level 1	Level 2	Level 3	Total
<u>Financial assets at FVPL</u>					
Egyptian listed equity instruments	6(c)	4,185	-	-	4,185
<u>Available for sale financial assets</u>					
Unlisted equity instruments	6(b)	-	12,283	-	12,283
Total financial assets		4,185	12,283	-	16,468
Financial liabilities					
Hedging derivatives – interest rate swaps	6 (f)	-	-	792,696	792,696
Call option agreement	6 (f)	-	-	4,456	4,456
Trading derivatives	5(g)	-	388,644	-	388,644
Total financial liabilities		-	388,644	797,152	1,185,796
Recurring fair value measurements					
At 31 December 2019					
Financial assets	Notes	Level 1	Level 2	Level 3	Total
<u>Financial assets at FVPL</u>					
Egyptian listed equity instruments	6(c)	3,010	-	-	3,010
<u>Available for sale financial assets</u>					
Unlisted equity instruments	6(b)	-	12,314	-	12,314
Total financial assets		3,010	12,314	-	15,324
Financial liabilities					
Hedging derivatives – interest rate swaps	6 (f)	-	-	330,356	330,356
Trading derivatives	5(g)	-	364,592	-	364,592
Total financial liabilities		-	364,592	330,356	694,948

There were no transfers between levels 1, 2 and 3 for recurring fair value measurements during the period /year.

Level 1: The fair value of financial instruments traded in active markets (such as trading instruments) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities and over the counter derivatives.

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

(ii) Valuation techniques used to determine fair values

Specific valuation techniques used to value financial instruments include:

- the use of quoted market prices or dealer quotes for similar instruments
- the fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves
- the available for sale unlisted equity investments compose interest in an investment fund. Fair value is measured by reference to published net asset value of the fund.
- the fair value of the remaining financial instruments is determined using discounted cash flow analysis.

Aside from traded financial instruments, which are included in level 1, all of the resulting fair value estimates are included in level 2 except for derivative contracts, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk.

(iii) Fair value measurements using significant unobservable inputs (level 3)

The following table presents the changes in level 3 items for the periods ended 30 September 2020 and 31 December 2019:

	Hedging derivatives	Total
Opening balance at 1 January 2019	212,556	212,556
losses recognised in other comprehensive income	(542,826)	(542,826)
Forex Gain	(86)	(86)
Closing balance at 31 December 2019	(330,356)	(330,356)
losses recognised in other comprehensive income	(470,564)	(470,564)
losses recognised through profit and loss	(4,456)	(4,456)
Forex gain	8,224	8,224
Closing balance at 30 September 2020	(797,152)	(797,152)

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial assets and financial liabilities (continued)

(iv) Valuation inputs and relationships to fair value

The following table summarises the quantitative information about the significant unobservable inputs used in level 3 fair value measurements. See (ii) above for the valuation techniques adopted.

Description	Fair value at		Un-observable inputs *	Range of Inputs		Relationship of unobservable inputs to fair value
	30 September 2020	31 December 2019		30 September 2020	31 December 2019	
Hedging derivatives – Interest rate swaps	(672,132)	(257,893)	Credit default rate	1.32%	1.32%	Applying a credit risk rate of 1.32% results in a change in fair value of hedging derivatives.
Interest rate swap contracts – cash flow hedge (Taqa)	(120,564)	(72,463)	Credit default rate probability of default	1.1%	1.1%	Applying a credit risk rate of 1.1% results in a change in fair value of hedging derivatives.
Call option agreement	(4,456)	-	rate	9%	-	Applying a probability of default rate of 9% results in a change in fair value of hedging derivatives.

* There were no significant inter-relationships between unobservable inputs that materially affect fair values.

(v) Valuation processes

The finance department of relevant subsidiary includes a team that performs the valuations on quarterly basis. The finance department places a partial reliance on experts in the valuation of hedging derivatives.

The main level 3 inputs used by the Group are derived and evaluated as follows:

- Discount rates for financial assets and financial liabilities are determined using a capital asset pricing model to calculate a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the asset.
- Risk adjustments specific to the counterparties (including assumptions about credit default rates) are derived from credit risk gradings determined by the Group's internal credit risk management group.
- Earnings growth factor for unlisted equity securities are estimated based on market information for similar types of companies.

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Non-financial assets and liabilities (continued)

(i) Depreciation, method used and useful lives

Depreciation expense is allocated in the consolidated statement of profit or loss, as follows:

	30 September 2020	31 December 2019
Cost of sales	2,639,983	379,638
General and administration expenses	79,184	108,098
	2,719,167	487,736

The straight-line method is used to allocate the depreciation of fixed assets consistently to their residual values over their estimated useful lives, except for lands, which are characterised with unlimited estimated useful life. Below are the estimated useful lives of each type of the assets:

Buildings and constructions	5-50 years
Leasehold improvements	3-10 years
Machinery, equipment and tools	4-33 years
Furniture and office equipment	4-16 years
Computers	2-10 years
Barges	5-20 years
Vehicles	3-20 years

(ii) Proceeds from sale of fixed assets

Proceeds from sale of fixed assets in consolidated cash flows statement, as follows:

	30 September 2020	31 December 2019
Net book value for disposal assets	21,705	63,751
Gain on disposal of fixed assets (Note 13)	23,307	43,540
Proceeds from sale of fixed assets	45,012	107,291

(iii) Changes in estimates

There were no material changes in the depreciation method, residual values or useful lives for any of the categories of fixed assets during the current period or prior year.

The subsidiary Takamol Sudan is operating in a hyperinflationary economy from 1 January 2018 onwards. Hyperinflation accounting resulted in the write up of non-monetary assets and a resulting increase in the carrying value of these operations. the carrying amount is lower than it's recoverable amount.

(iv) Non-current assets pledged as security

Borrowings (note 6(h)) are secured by various categories of fixed assets with the following carrying amounts:

	Carrying amount of fixed assets
Subsidiaries:	
National Company for Development and Trading "NDT"	1,010,349
Orient Investment Properties Ltd.	60,118,414
Asec for Mining – ASCOM	737,297
Taqa Marketing	164,529

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Non-financial assets and liabilities (continued)

(v) Projects under construction

Balance of projects under construction comprises of the following:

	30 September 2020	31 December 2019
Energy sector	825,926	62,287,408
Transportation and logistics sector	93,391	88,174
Packaging and printing sector	115,713	44,601
Financial services sector	23,851	23,160
Agriculture and food sector	12,526	17,902
Cement sector	17,617	16,126
Mining sector	2,979	1,447
Others	2,659	1,816
Total	1,094,662	62,480,634

(vi) Critical accounting estimates and assumption

1. Useful life of fixed assets

Fixed assets are considered a significant part of the Group's total assets and the relevant depreciation expense is also considered a significant part of the annual operating expenses. The useful life of fixed assets, which is based on management's estimates and assumptions had a material impact on the amounts of fixed assets. Fixed assets have useful lives ranging between 2 year to 50 years. The useful life of each item of fixed assets is estimated based on experience of similar assets and guided by other companies' estimates the internal estimates concluded by the technical department, as well as the expected flow of economic benefits to the Group during the period of the operation of that asset. Estimates and assumptions of the useful lives of fixed assets are reviewed periodically in the event of any changes or adjustment to useful lives and the residual value. Such adjustment, if any, will be applied on the future periods.

2. Impairment of Fixed asset

Due to the COVID-19 pandemic there was indicators for impairment of fixed assets and right of use assets, the Group test the fixed asset and right of use assets impairment based on recoverable amount of cash-generating unit is estimated by calculating the value in use, using pre-tax cash flows based on financial budgets approved by management, which cover a period of five years maximum. The management determines the specific assumptions of cash flow forecasts based on past experience and expectations of the market. Group management determines assumptions related to cash flow forecasting based on sales growth and operating costs and estimated profits.

Fixed assets is allocated to cash-generating units (CGUs, which represent the lowest level within the Group at which the fixed assets is monitored by management which is the level of the operating segment)

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Non-financial assets and liabilities (continued)

The recoverable amount of each CGU was determined based on value-in-use calculations. These calculations use cash flow projections based on financial budgets approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated using the estimated growth rate stated below. The growth rates do not exceed the long-term average growth rate for the business sector of the economy in which the CGU operates.

Assumptions used for value-in-use calculations to which the recoverable amount is most sensitive were:

	Growth rate beyond five years	Pre-tax discount rate	Average of gross profit
Energy	3%	16%	11%
Cement	4%	16.7%	23.3%
Mining	4%	12.6%	31%
Agriculture food industries	4%	20%	28%
Packaging & printing sector	4%	17.4%	24.4%
Other	4%	16.4%	17.6%

Growth rate: This is represented in the weighted average of growth rate used for forecasting the cash flows of the years following the financial budget period. Growth rates correspond with the reports of the industry where the CGU is adopted.

Profit margins: Estimations are based on the historical performance and management's expectation of the future.

Discount rate before tax: This rate reflects the risks related to the CGU and the industry where these units are adopted.

(vii) Impairment charge

During the period ended 30 September 2020, no impairment losses were recognized in the fixed assets.

At 30 September 2020							
Cost	730,386	443,295	237,545	121,637	6,087	25,618	1,564,568
Accumulated amortization and impairment	(41,123)	(35,576)	(18,053)	(45,524)	(3,847)	(1,217)	(145,340)
Net book amount	689,263	407,719	219,492	76,113	2,240	24,401	1,419,228

2. Lease liabilities

	30 September 2020	31 December 2019
Current	300,797	98,300
Non- Current	1,215,779	184,787
	1,516,576	283,087

- Lease liabilities are effectively secured as the rights to the leased assets recognised in the financial statements revert to the lessor in the event of default.

(i) Amounts recognized in the statement of profit or loss :

The consolidated interim statement of profit or loss shows the following amounts relating to lease liabilities:

	30 September 2020	31 December 2019
Interest expense (included in finance cost)	141,737	-
Expense related to short term and low value leases (included in COGS and G&A)	176,103	-

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Non-financial assets and liabilities (continued)

(ii) The Group's leasing activities and how these are accounted for:

Leases are recognized as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

7(c) Intangible assets

	Computer software	Exploration license and extraction	Trademark	Customer contracts	Other license	Total

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Non-financial assets and liabilities (continued)

	Computer software	Exploration license and extraction	Trademark	Customer contracts	Other license	Total
The year ended 31 December 2019						
Net book value at 1 January 2019	15,667	-	123,234	203,250	-	342,151
Additions	14,421	-	-	-	-	14,421
Foreign currency translation differences – cost	(4,755)	-	-	-	-	(4,755)
Amortization during the year	(5,324)	-	-	(25,164)	-	(30,488)
Foreign currency translation differences- accumulated amortization	4,074	-	-	-	-	4,074
Net book value	24,083	-	123,234	178,086	-	325,403
31 December 2019						
Cost	74,827	40,684	369,512	461,637	5,101	951,761
Accumulated amortization	(50,682)	(8,406)	-	(283,551)	-	(342,639)
Accumulated impairment	(62)	(32,278)	(246,278)	-	(5,101)	(283,719)
Net carrying value	24,083	-	123,234	178,086	-	325,403

(i) Amortization, method used and useful lives

Amortization expense is allocated in the consolidated statement of profit or loss, as follows:

	30 September 2020	31 December 2019
Cost of sales	3,932	5,324
General and administration expenses	18,585	25,164
	22,517	30,488

The straight-line method is used to allocate the amortization of intangible assets consistently over their estimated useful lives, except for trademarks which has indefinite lives. Below are the estimated useful lives of each type of the assets' groups:

Licences	10 years
Customer contracts	4-18 years
Computer software	10 years

The Group's management amortised intangible assets related to new technology provided by one of the Korean companies using the straight-line basis over 5 – 10 years which was assumed based on the technical experience of the Group's management and the future technical utilisation of such technology or the life of the contract whichever is shorter. Estimates and assumptions of the useful lives of intangible assets- technical information are reviewed periodically in the event of any changes or adjustment to useful lives and the residual value. Such adjustment, if any, will be applied on the future periods.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Non-financial assets and liabilities (continued)

Intangible assets with definite useful life

- Customer contracts were acquired as part of the business combination of Silverstone Capital Investment Ltd segment attributable to TAQA Arabia CGU. Customer contracts recognized at their fair value at the date of acquisition and are subsequently amortized on a straight- line based on the expected useful lives contracts of future economic benefits. The Group management has assessed the existing customer contracts for impairment and no indication for impairment exists.

Intangible assets with indefinite useful life - trademark

- Trademark amounted to EGP 108,279 as a result of the acquisition of Silverstone Capital Investment Ltd. attributable to TAQA Arabia CGU that owns the trademark of TAQA and operates a network of service stations selling refined petroleum products and fuel oil to retail, industrial and wholesale customers. These rights have no definite useful life.
- Trademark amounted to EGP 14,955 as a result of the acquisition of Falcon for Agricultural Investments Ltd. that owns trademark of Dina Farms CGU which produces pasteurized fresh milk and sells dairy produce locally and internationally. These rights have no definite useful life.

(ii) Significant estimates

Impairment test for indefinite useful life intangible assets

Indefinite life intangible assets are monitored by management at the level of operating segment – cash generating unit. The impairment of intangible assets is reviewed annually to ensure that the carrying value of the intangible assets does not exceed the recoverable amount.

The Group management test the impairment of the trademarks based on the recoverable amount for cash generating unit which is estimated by calculating the value in use by using net forecasted cash flow for the next five years. Management determine assumptions related to cash flow forecasting based on previous experience and market predictions by preparing business plans using the growth rate and the discount rate prevailing. Cash flows beyond the five-year period are extrapolated using the estimated growth rate stated below. This growth rate is consistent with forecasts included in industry reports specific to the industry where each CGU operates.

Assumptions used by the Group when testing the impairment of TAQA Arabia trademark as at 30 September 2020 and 31 December 2019 are as follows:

	30 September 2020	31 December 2019
Average gross margin	11%	11%
Sales growth rate	16%	16%
Pre-tax discount rate	21%	21%
Growth rate beyond five years	4%	4%

CITADEL CAPITAL COMPANY (S.A.E).
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Non-financial assets and liabilities (continued)

Sensitivity of recoverable amounts

The growth rate beyond five years has been estimated to be 4%. If all other assumptions kept the same, a reduction of this growth rate by 100% would give a value in use exceed the current carrying amount.

The discount rate in the forecast period has been estimated to be 21%. If all other assumptions kept the same, and the discount rate is 30% would give a value in use exceed the current carrying amount.

Assumptions used by the Group when testing the impairment of Dina Farms trademark as at 30 September 2020 and 31 December 2019 are as follows:

	30 September 2020	31 December 2019
Average gross margin	28%	28%
Sales growth rate	15%	15%
Pre-tax discount rate	20%	20%
Growth rate beyond five years	4%	4%

Sensitivity of recoverable amount

The growth rate in the forecast period has been estimated to be 4%. If all other assumptions kept the same, a reduction of this growth rate by 100% would give a value in use exceed the current carrying amount.

The discount rate in the forecast period has been estimated to be 20%. If all other assumptions kept the same, and the discount rate is 27% would give a value in use exceed the current carrying amount.

Group management has considered and assessed reasonably possible changes in any of the key assumptions and no instances were identified that could cause the carrying amount to exceed the recoverable amount and could result in an impairment for any intangible assets allocated to TAQA or Dina Farms CGUs.

7(d) Goodwill

The following companies are considered the CGU(s), which was the basis for Goodwill resulting from acquisition.

	Sector	Balance at 1 January 2020	Balance as at 30 September 2020
Falcon for Agricultural Investments Ltd. Group-BVI	Agriculture and Food Sector	205,570	205,570
Tawazon for Solid Waste Management (Tawazon) Company Group	Energy Sector	32,611	-
Balance		238,181	205,570

CITADEL CAPITAL COMPANY (S.A.E).

For the nine months period ended 30 September 2020

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Non-financial assets and liabilities (continued)

		Balance at 1 January 2020	Transfer to Assets held for sale	Impairment	Balance at 30 September 2020
	Sector				
Falcon for Agricultural Investments Ltd. Group-BVI	Agriculture and Food Sector	205,570	-	-	205,570
Tawazon for Solid Waste Management (Tawazon) Company Group	Energy Sector	32,611	(32,611)	-	-
Balance		238,181	(32,611)	-	205,570

(i) Significant estimates
Impairment of goodwill

The Group test the Goodwill impairment annually based on recoverable amount of cash-generating unit is estimated by calculating the value in use, using pre-tax cash flows based on financial budgets approved by management, which cover a period of five years maximum. The management determines the specific assumptions of cash flow forecasts based on past experience and expectations of the market. Group management determines assumptions related to cash flow forecasting based on sales growth and operating costs and estimated profits. Taking into consideration capital expenditures for future renewable plans.

Goodwill is allocated to cash-generating units (CGUs, which represent the lowest level within the Group at which the goodwill is monitored by management which is the level of the operating segment)

The recoverable amount of each CGU was determined based on value-in-use calculations. These calculations use cash flow projections based on financial budgets approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated using the estimated growth rate stated below. The growth rates do not exceed the long-term average growth rate for the business sector of the economy in which the CGU operates.

Assumptions used for value-in-use calculations to which the recoverable amount is most sensitive were:

	Dina for Agricultural Investments	Tawazon for Solid Waste Management
Growth rate beyond five years	4%	4%
Pre-tax discount rate	20%	21%
Average of gross profit	28%	20%

Growth rate: This is represented in the weighted average of growth rate used for forecasting the cash flows of the years following the financial budget period. Growth rates correspond with the reports of the industry where the CGU is adopted.

Profit margins: Estimations are based on the historical performance and management's expectation of the future.

Discount rate before tax: This rate reflects the risks related to the CGU and the industry where these units are adopted.

(ii) Impairment charge

During the period ended 30 September 2020, no impairment losses were recognized in the goodwill related to Dina for Agriculture Investments and Tawazon for Solid Waste Management

7(e) Biological assets

	30 September 2020	31 December 2019
Non-current		
Pregnant heifer, dry and dairy cows	235,963	203,527
Heifers	162,841	145,904
Fruitful fruit gardens and orchards	7,264	6,636
Fruitless fruit gardens and orchards	4,485	3,098
	410,553	359,165
Current		
Plants	13,410	20,620
Accumulated impairment loss	(2,357)	(2,401)
Net	11,053	18,219
Total	421,606	377,384

Biological assets are accounted for in accordance with the Group policy disclosed in [note 29\(f\)](#) and is measured at fair value less cost to sell.

(i) Measuring biological assets at fair value:

Cattles are measured at fair value less cost to sell on the reporting date, based on market prices for similar age, breed and genetic. The fair value of dairy milk, growing fruit gardens and orchards is determined using the discounted cash flow model based on the expected fruits yield by plantation size, the market price for fruits after allowing for harvesting cost. the Group has classified its non-financial and assets and liabilities into the three levels prescribed under EAS 45 "Fair value measurement". An explanation of each level is provided in [note 5 \(i\)](#).

Cattles, diary milk and growing fruit gardens and orchards fall under level 2 of the fair value hierarch.

(ii) Valuation process

The fair value of biological assets (herd) is measured through the observable market of the same breed (Holstein) in the United States of America and all other costs necessary incurred by the company to bring the assets to its location. Price quotation are obtained through the company's supply chain department.

(iii) Reconciliation of biological assets carrying amount are as follows:

	30 September 2020	31 December 2019
Balance as at 1 January	359,165	302,294
Gains resulted from the change in fair value less cost to sell	90,126	110,373
Decrease due to sales	(38,721)	(49,198)
Disposals	-	(1,491)
Foreign currency translation	(17)	(2,813)
Balance	410,553	359,165

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Equity (continued)

(i) Shareholders reserve

Egyptian Refining Company "ERC" contractually agreed that, ERC shall procure that it and its shareholders allocated to the Egyptian General Petroleum Corporation "EGPC" a fifteen percent (15%) shareholding in ERC at a price equal to the par value of the relevant shares. Half of such price shall be paid by EGPC in cash upon demand by ERC in the same manner as all other shareholders of ERC, whereupon ERC shall promptly procure that transfer or issue to EGPC of shares in ERC representing a fifteen percent (15%) shareholding in ERC. The remaining half of such price shall be paid by the Arab Refining Company S.A.E on behalf of EGPC and paid back by EGPC to the Arab Refining Company S.A.E (a) by way of retentions from dividends payable to EGPC in respect of such shares or (b) immediately upon any sale by EGPC of any such shares, If EGPC does not pay the half of such price payable in cash upon the demand of ERC, ERC shall be deemed to have satisfied its obligations under this agreement, and EGPC shall be deemed to have elected not to become a shareholder in ERC.

EGPC has not assumed the risks related to the un-paid shares to which they have subscribed for in ERC share capital as EGPC is protected from any losses related to half of the shares, does not receive any dividends until the loan is settled and will benefit from the shares. EGPC assumes no downside on the ERC shares but receives the upside of the shares. The total amount of shares is USD 85.05 Million representing 6.28% shareholding in ERC.

The loan extended to EGPC does not accrue interest and there is no security or recourse to other assets for which contractual right of payment could be established, where shares paid on behalf of EGPC have been included in the non-controlling interest line item for the value of 2020: USD 85.05 Million . Until the loan is repaid, the shares will be continued to be shown as not issued to EGPC.

In accordance with Egyptian Accounting Standard "EAS 39"- Share based payments, where such a transaction occurs the rationale is that the entity must have received some unidentifiable consideration equal to the difference between the fair value of the equity transferred and the fair value of the consideration received.

Therefore, the transaction represents an equity-settled based payment transaction. Accordingly, the loan would be fair valued initially on the date of the agreement and would not require fair value at each reporting period. EGPC have already paid 7.5% of ERC equity shares and the other half which amounts to USD 85.05 Million will be shown in the shareholders reserve and represents the shares for which the loan was extended to EGPC.

(ii) Hedging reserve

The hedging reserve includes the cash flow hedge reserve and the costs of hedging reserve. The cash flow hedge reserve is used to recognise the effective portion of gains or losses on derivatives that are designated and qualify as cash flow hedges.

The Group defers the changes in the forward element of forward contracts and the time value of option contracts in the costs of hedging reserve. These deferred costs of hedging are included in the initial cost of the project under construction when it is recognised.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Performance

9. Segment information

The Management Board is identified as the Chief Operating Decision-Maker (CODM) at Group level.

9(a) Description of segments and principal activities

The following summary describes each reportable segment:

Energy sector

Citadel Capital Company has invested in energy as one of the core industries within the Group segments. Its integrated investments along the value chain, midstream and downstream including refining, energy distribution, power generation and solid waste management , provide solutions that truly tackle the energy problems that faces today.

Cement Sector

Citadel Capital Company in the cement sector produce high-quality building materials that meet international environmental standards, while helping build critical national infrastructure in Africa and the Middle East. Citadel Capital, through its subsidiary company ASEC Holding, has pursued promising opportunities in regional markets with strong fundamentals where the demand for cement continues to outpace supply.

Transportation and logistics

Citadel Capital Company investments in the river transport, logistics and port management sector as fuel subsidies are gradually removed in Egypt and fuel becomes more costly, manufacturers will be seeking alternative means of transporting goods. Time to move cargo via river barges, which are a more efficient, affordable and environmentally friendly means of transport relative to trucking. The capacity of one river barges is equivalent to 40 trucks, with only one-quarter of the emissions.

Mining

Citadel Capital Company investments in the mining sector help develop nations and add value to their natural resources. All of Group investments in the mining sector focus on research and development, precious metals mining, mining for the cement industry, quarry management and the production of insulation materials products for domestic and export consumption to help countries in Africa and the Middle East unlock their economic potential.

Agriculture food industries

Citadel Capital Company investments in agri-foods aim to overcome challenges facing the agricultural and food production sector in Egypt and the region. Citadel Capital Companies in the agri-foods sector bring trusted household names to market, through Dina farms, ICDP (Dina Farms' fresh dairy producer).

Packaging and printing sector

Citadel Capital invest in Packaging and printing segment aims to create shareholders liquidity while remaining firmly committed to capital growth Grandview group enjoys a strong market share in folder boxes, laminated boxes, books and paper in Egypt.

Net	1,351,737	181,263	435,854	45,253

17(b) Significant estimates

The Group is subject to income tax in several countries. The provision for income tax is estimated by the Group through the tax department and management's consultants. Because of the nature of the procedures of estimating tax liabilities in these countries, the final product of the tax estimate by the Tax Authority may not be realistic. Therefore, additional possible tax liabilities may arise as a result of tax inspection, and the estimate of Tax Authorities for tax due from the Group. In case of any variation between the preliminary and final estimates, such variation will affect the income tax expense in the period in which it arises.

Other information

21. Related party transactions

The Group entered into several transactions with companies and entities that are included within the definition of related parties, as stated in EAS 15, "Disclosure of related parties". The related parties comprise the Group's board of directors, their entities, companies under common control, and/ or joint management and control, and their partners and employees of senior management. The partners of joint arrangement and non-controlling interest are considered by the Group as related parties. The tables below show the nature and values of transactions with related parties during the year, and the balances due at the date of the consolidated interim financial statements.

Related party transactions (continued)

21(c) Key management compensation

The Group paid EGP 212,215 – as salaries and benefits to senior management personnel during the period ended 30 September 2020 (31 December 2019: EGP 232,998).

22. (Losses) earnings per share

Basic (losses) earnings per share is calculated by dividing the (losses) / profit attributable to equity holders of the Group by the weighted average number of ordinary shares in issue during the period after excluding ordinary shares held in treasury.

	Nine months ended 30 September		Three months ended 30 September	
	2020	2019	2020	2019
Net loss for the period- Continued operations	(6,154,081)	(909,572)	(2,074,911)	(445,102)
Net gain (loss) for the period- Discontinued operations	(109,655)	8,343	(104,018)	(6,448)
Net loss for the period	(6,263,736)	(901,229)	(2,178,929)	(451,550)
Weighted average number of shares including preferred shares with the same distribution rights as ordinary shares	1,820,000	1,820,000	1,820,000	1,820,000
	Nine months ended 30 September		Three months ended 30 September	
	2020	2019	2020	2019
Net Loss per share – Continued operation	(3.381)	(0.500)	(1.140)	(0.245)
Net earnings (Loss) per share – Discontinued operation	(0.060)	0.005	(0.057)	(0.004)
Loss per share (EGP)	(3.441)	(0.495)	(1.197)	(0.249)

Diluted (losses) / earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Group does not have any categories of dilutive potential ordinary shares on 30 September 2020 and 30 September 2019, hence the diluted (losses) / earnings per share is the same as the basic (losses) / earnings per share.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

23. Employees Stock Option Plan

The Holding Company's extraordinary general assembly meeting held on 20 February 2008 approved to add a new article to the Holding Company Article of Association to adopt a plan or more to motivate employees, managers and executive board of directors – Employees Stock Option Plan (ESOP) in accordance with decision No. 282 for 2005 which modified executive regulation for the law No. 159 / 1981.

On 18 October 2018, Citadel BOD announces to the Egyptian stock market, its intention to renew the expired ESOP plan for eight years starting from the approval of FRA on the plan. On 10 December 2018, Citadel Company's extraordinary general assembly meeting approved the new plan. The renewed ESOP promises employees, managers and executive board of directors' members to acquire shares/ designate share as follows:

- Total designated ESOP is the same number of shares approved through the old plan with minor increase to reach 120 million shares. Entitlement mechanism will be as follows:
 - 30% of the designated shares will be issued at 5.25 pounds per share from ESOP starting date till 30 April 2023.
 - 70% of the designated shares will be issued at 6 pounds per share from ESOP starting date till 30 April 2026.
- Exercise on shares have to be either through:
 - Paying the 5.25 pounds or the 6 pounds per share to the company and obtain the ownership of the shares., or
 - Requesting the oversight committee to pay him/her the remaining amount of the designated shares selling proceeds after deducting the agreed share price of 5.25 pounds or the 6 pounds per share.

The Holding Company has not yet obtained the approvals from the Financial Regulatory Authority on the employees stock option plan until the preparation of these consolidated interim financial statements. Accordingly, it is not yet activated.

24. Tax position of Citadel Capital Company

24(a) Corporate tax

The Holding Company submitted its tax returns on regular basis for the years from 2005 to 2018 according to tax law No. 91/2005. The Company's books have not been inspected yet.

24(b) Payroll tax

The Holding Company deducts the salaries tax according to tax law no. 91/2005 and the Company's books have been inspected for the period since inception till 31 December 2009 but the authority did not inform the Holding Company with results yet, and the years from 2010 to 2019 have not been inspected yet.

Tax position of Citadel Capital Company (continued)

24(c) Stamp duty tax

The Holding Company's books have been inspected since inception till 31 July 2006 and settled the due amounts resulted from inspection.

The Holding Company's books have been inspected from 1 August 2006 to 31 December 2013 and the dispute has been transferred to Internal Committee.

The Holding Company's books have not been inspected for the years after 2013.

24(d) Withholding tax

The Holding Company applies the withholding tax in accordance with tax law No. 91/2005. The Holding Company's books have not been inspected since inception till 30 September 2020.

25. Comparative figures

Certain comparative figures have been reclassified in the consolidated statement of financial position to conform with the current period presentation. The following table summarizes the reclassification on the consolidated financial position as at 31 December 2019.

	31 December 2019 As issued	Reclassifications	31 December 2019 After Reclassification
Fixed assets	70,047,463	(375,774)	69,671,689
Right of use assets	-	375,774	375,774
Loans and borrowings – Non-current portion	40,542,959	(184,787)	40,358,172
Loans and borrowings – Current portion	17,996,282	(98,300)	17,897,982
Lease liabilities – Non-current portion	-	184,787	184,787
Lease liabilities – Current portion	-	98,300	98,300

The results of the operations of the previous year of some of the subsidiaries of "Tawazon for Solid Waste Management "Tawazon" (S.A.E.)" were reclassified to the discontinued operations as a result of the Group's decision to sell those subsidiaries. The following table summarizes the reclassification on the consolidated statement of profit or loss as at 30 September 2019.

	30 September 2019 As issued	Reclassifications	30 September 2019 After Reclassification
Revenue	11,125,503	(350,377)	10,775,126
Cost of revenue	(9,587,703)	284,492	(9,303,211)
General and administrative expenses	(1,233,168)	23,712	(1,209,456)
Other operating expenses	(312,406)	9,510	(302,896)
Finance costs – net	(697,980)	(211)	(698,191)
Income tax expense	(191,655)	10,392	(181,263)
Loss from discontinued operations	(14,140)	22,482	8,342

For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Risk

26. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

26(a) Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will seldom equal the actual results. The estimates and assumptions that have a material impact to the carrying amounts of assets and liabilities within the next financial year are addressed below.

- Impairment of trade receivables and other debit balances – note 6(a)(v)
- Useful life of fixed assets – note 7(a)(i)
- Useful life of intangible assets – note 7(c)(i)
- Impairment of goodwill – note 7(d)(i)
- Provision for income tax – note 17(b)
- Provisions – note 7(h)(i)

26(b) Critical judgments in applying the Group's accounting policies

In general, applying the Group accounting policies does not require judgments other than the below and apart from those involving estimates refer to in note 26(a) above that have significant effects on the amounts recognized in the consolidated interim financial statements.

- Hyperinflationary Economies – See note 5(a)
- Consolidation of Arab Refining Company – S.A.E “ARC” and its subsidiary Egyptian Refining Company – S.A.E (“ERC”) – note 3(e)(i)
- Control over Egypt Refining Company – note 3(e)(ii)

27. Financial risk management

The Group's activities expose it to a variety of financial risks. These risks include market risks (including foreign currency exchange risks, prices risks, cash flow interest rate risks and fair value risks), credit risks, and liquidity risks.

The Group's management aims to minimise the potential adverse effects on the Group's financial performance, through the monitoring process performed by the Group's Finance Department and the Holding Company's chairman.

27(a) Derivatives

The Group uses derivative financial instruments to hedge certain risk exposures. Where all relevant criteria are met, hedge accounting is applied to remove the accounting mismatch between the hedging instrument and the hedged item. This will effectively result in recognising interest expense at a fixed interest rate for the hedged floating rate loans.

CITADEL CAPITAL COMPANY S.A.E.
AND ITS SUBSIDIARIES
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial risk management (continued)

The Group has the following derivative financial instruments:

	30 September 2020	31 December 2019
Non-current (liabilities) assets		
Interest rate swap contracts – cash flow hedges	(797,152)	(330,356)
Total non-current derivative financial instrument (liabilities) assets	(797,152)	(330,356)

(i) Classification of derivatives

Derivatives are accounted for at fair value through profit or loss unless they are designated as hedges. They are presented as current assets or liabilities if they are expected to be settled within 12 months after the end of the reporting year.

The Group's accounting policy for its cash flow hedges is set out in [note 29\(I\)](#).

All derivative financial instruments are represented in interest rate swaps which have maturities of more than twelve months and are classified within 'non-current assets/liabilities'.

(ii) Hedge ineffectiveness

Cash flow hedge is a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognized asset or liability, such as all or some future interest payments on variable rate debt or a highly probable forecast transaction and could affect profit or loss.

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument.

The Group enters into interest rate swaps that have similar critical terms as the hedged item, such as, payment dates, maturities and notional amount. The Group does not hedge 100% of its loans, therefore the hedged item is identified as a proportion of the outstanding loans up to the notional amount of the swaps. As all critical terms matched during the year, the economic relationship was 100% effective.

In hedges of interest rate swap, ineffectiveness may arise if the timing of the forecast transaction changes from what was originally estimated, or if there are changes in the credit risk of the derivative counterparty. It may occur due to:

- The credit value/debit value adjustment on the interest rate swaps which is not matched by the loan, and
- Differences in critical terms between the interest rate swaps and loans.

There was no ineffectiveness during the period ended 30 September 2020 or the year ended 31 December 2019 in relation to the interest rate swaps.

Financial risk management (continued)

27(b) Market risk

(i) Foreign currency exchange risks

Foreign currency exchange rates risks are the risks of fluctuations in the fair value of future cash flows of a financial instrument due to changes in foreign currency exchange rates. The following analysis shows the calculation of the effect of reasonable and possible changes in foreign currencies against the functional currency of the Group while keeping all other variables constant, on the consolidated statement of comprehensive income:

	30 September 2020	31 December 2019
United States Dollar 10%	(389,474)	115,457
Euro 10%	67,116	62,805
Sterling Pound 10%	(85)	(206)
United Arab Emirates Dirham 10%	1,472	1,557
Saudi Arabia Riyal 10%	106	(47)
Sudanese Pound 10%	(983)	(10)
Algerian Dinar 10%	1,498	2,019
Swiss Franc 10%	(15)	68
Jordanian Dinar 10%	493	280
Libyan Dinar 10%	(779)	(779)
Riyal Omani 10%	(5,931)	(5,054)
Syrian Lira 10%	(852)	(852)

The following table shows the currencies position denominated in Egyptian Pounds at the date of the consolidated statement of financial position:

	30 September 2020			31 December 2019
	Assets	Liabilities	Net	Net
United States Dollar	1,938,187	(5,832,925)	(3,894,738)	1,154,572
Euro	1,285,307	(614,145)	671,162	628,046
Sterling Pound	5	(850)	(845)	(2,057)
United Arab Emirates Dirham	15,965	(1,243)	14,722	15,566
Saudi Arabia Riyal	953	104	1,057	(473)
Sudanese Pound	128	(9,957)	(9,829)	(97)
Algerian Dinar	15,441	(460)	14,981	20,193
Swiss Franc	948	(1,099)	(151)	684
Jordanian Dinar	5,046	(113)	4,933	2,802
Libyan Dinar	-	(7,790)	(7,790)	(7,793)
Riyal Omani	-	(59,314)	(59,314)	(50,537)
Syrian Lira	-	(8,523)	(8,523)	(8,523)

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial risk management (continued)

(ii) Price risk

The Group's exposure to equity securities price risk arises from investments held by the Group and classified in the statement of financial position either as available-for-sale or at fair value through profit or loss (FVPL).

Available-for-sale financial assets are measured at cost less impairment due to the difficulty in calculating fair value reliably. Financial assets at fair value through profit or loss are considered immaterial, and accordingly the Group considered that exposure to price risk is insignificant.

The Group is also exposed to risks arising from environmental and climatic changes, and commodity prices affecting the biological asset held by the Group.

The Group has strong environmental policies and procedures in place to comply with environmental and other laws.

(iii) Cash flows and fair value interest rate risks

The Group's main interest rate risk arises from long-term borrowings with variable rates, which expose the Group to cash flow interest rate risk. Group policy is to maintain at least 90% of Egyptian Refining Company S.A.E syndicate borrowings at fixed rate using interest rate swaps to achieve this when necessary. During the year ended 30 September 2020 and 31 December 2019, the group's borrowings at variable rate were mainly denominated in Egyptian Pounds and US Dollars.

The Group's borrowings and receivables are carried at amortized cost. The borrowings are periodically contractually repriced and to that extent are also exposed to the risk of future changes in market interest rates.

The Group manages its cash flow interest rate risk by using floating-to-fixed interest rate swaps. Under these swaps, the Group agrees with other parties to exchange, at specified intervals (mainly quarterly), the difference between fixed contract rates and floating rate interest amounts calculated by reference to the agreed notional principal amounts. Generally, the Group raises long-term borrowings at floating rates and swaps them into fixed rates that are lower than those available if the Group borrowed at fixed rates directly.

The exposure of the Group's borrowing to interest rate changes and the contractual at the end of the reporting period are as follows:

	<u>30 September 2020</u>	<u>% of loans</u>	<u>31 December 2019</u>	<u>% of loans</u>
Variable rate borrowings	56,482,522	94%	58,539,241	94.85%

CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial risk management (continued)

27(c) Credit risk

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, as well as credit exposures to trade receivables and other debit balances and amounts due from related parties. The Group's credit risk are managed as a whole, except for the credit risk related to the customers' account balances, as each of the Group's companies manages and analyses the credit risk of their own customers.

For banks and financial institutions, only high-credit-quality and rating banks and financial institutions are accepted.

For the new customers, their credit risk are analysed before standard payment and delivery terms and conditions are agreed with customers.

If trade receivables are independently rated, these ratings are used. If there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Credit limits are set for each customer based on internal and external credit limits in accordance with limits set by the board. The credit limits are regularly reviewed for each individual customer.

Balances exposed to credit risks are as follows:

	30 September 2020	31 December 2019
trade and other receivables	6,614,635	7,653,055
Due from related parties	351,612	346,023
Cash and bank balances	5,300,194	3,667,814
	12,266,441	11,666,892

Impairment of trade and other receivables movement represented as follows:

	30 September 2020	31 December 2019
Balance as of January 1 before EAS 47 adjustment	972,184	950,181
Adjustment due to EAS 47 (see Note 29(a) (v))	99,492	-
Balance as of January 1 after EAS 47 adjustment	1,071,676	950,181
Formed during the period / year	23,646	60,218
No longer required	(9,136)	(5,338)
Utilised during the period / year	(7,294)	(11,497)
Transfer from assets held for sale	-	21,965
Write off	(7,957)	-
Foreign currency translation differences	(4,214)	(43,345)
Balance	1,066,721	972,184

CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial risk management (continued)

The Group applies the EAS 47 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables and contract assets.

To measure the expected credit losses, trade receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due. The contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets.

The expected loss rates are based on the payment profiles of sales over a period of 36 month before 30 September 2020 or 1 January 2020 respectively and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Group has identified the GDP and the unemployment rate of the countries in which it sells its goods and services to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors

Set out below is the information about the Group's trade receivables and contract assets using a provision matrix:

30 September 2020	Days past due				Total
	Current	< 30 days	Between 31 and 120 days	> 120 days	
Expected loss rate, %	13%	7%	17%	15%	
Trade receivables	6,382,973	181,424	175,224	911,174	7,650,795
Expected credit losses	(854,744)	(12,001)	(28,954)	(140,461)	(1,036,160)
Trade receivables, net	5,528,229	169,423	146,270	770,713	6,614,635

Trade receivables and contract assets are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the group, and a failure to make contractual payments for a period of greater than 120 days past due.

Significant estimates and judgements

Impairment of financial assets

The loss allowances for financial assets are based on assumptions about risk of default and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Details of the key assumptions and inputs used are disclosed in the table above.

For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Financial risk management (continued)

27(d) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due, due to shortage of funding. Group's exposure to liquidity risk results primarily from the lack of offset between assets of maturities of assets and liabilities.

The management makes cash flow projections on periodic basis, which are discussed during the Executive Committee's meeting of the parent company, and takes the necessary actions to negotiate with suppliers, follow-up the collection process from customers and manage the inventory balances in order to ensure sufficient cash is maintained to discharge the Group's liabilities. The Group's management monitors liquidity requirements to ensure it has sufficient cash and cash equivalents to meet operational needs while maintaining sufficient cash cover to meet the cash outflows to settle the obligations of loans and borrowings to be able to maintain financial terms, guarantees and covenants at all times.

The Group limits liquidity risk by maintaining sufficient bank facilities and reserves, and by monitoring cash forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below summarises the maturities of the Group's financial liabilities at 30 September 2020 and 31 December 2019, based on contractual payment dates.

	Below 6 months	From 6 months to 1 year	From 1 year to 2 years	Above 2 years
31 December 2019				
Borrowings	3,504,440	14,608,310	8,321,585	32,104,906
Trade payables and other credit balances	-	10,679,343	299,255	-
Due to related parties	-	1,678,175	-	-
Total	3,504,440	26,965,828	8,620,840	32,104,906
30 September 2020				
Borrowings	18,925,580	2,422,682	8,403,514	30,312,946
Trade payables and other credit balances	11,242,018	900,183	206,805	121,490
Due to related parties	1,496,573	32,975	-	-
Total	31,664,171	3,355,840	8,610,319	30,434,436

28. Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders using the financial statements. The Groups also aims to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce the Group's debts.

The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings and bank overdrafts less cash and bank balances. The total share capital comprises the amount of equity and net loans.

Net debt to total capital ratio

Net debt to total capital ratio as at 30 September 2020 and 31 December 2019 is as follows:

	30 September 2020	31 December 2019
Total borrowings		
Loans and borrowings	60,064,722	58,256,154
Less: Cash and bank balances	(5,300,194)	(3,667,814)
Net borrowings	54,764,528	54,588,340
Equity	4,973,522	12,183,330
Total capital	59,738,050	66,771,670
 Net debt to total capital	 92%	 82%

29. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated interim financial statements are summarised below. They were applied consistently over the presented financial periods unless otherwise stated:

29(a) Basis of preparation

(i) Compliance with EAS

The consolidated interim financial statements of the Citadel Capital Company "S.A.E." group have been prepared in accordance with Egyptian Accounting Standards (EAS) [EAS 30 "Interim Financial statements"], Egyptian Accounting Standards Interpretations (EAI) and relevant laws. The consolidated interim financial statements comply with the Egyptian Accounting Standards and its modifications as issued by the Minister of Investment and International Cooperation on 18 March 2019.

On 17 September 2020, the prime minister issued a resolution No. 1871 of 2020, Deferring the effective date for the implementation of the new Egyptian Accounting Standards [EAS (47) "Financial instruments", EAS (48) "Revenue from Contracts with Customers" and EAS (49) "Leases"] that was previously issued On 28 March 2019, under the Resolution No. 69 of 2019, The amendments in this Resolution defer the mandatory effective dates of the new standards from 1 January 2020 to 1 January 2021, with the option for the early adoption, this amendments are effective upon issuance of such resolution.

However the Group decided to choose the Early adoption option for all of the above mentioned new standards starting from 1 January 2020.

(ii) Historical cost convention

The consolidated interim financial statements have been prepared on a historical cost basis, except for the following:

- certain financial assets (including derivative instruments) – measured at fair value
- biological assets – measured at fair value, and
- defined benefit plans – measured using the projected credit method.
- Assets and liabilities arising from lease contracts.
- Goodwill.
- Right of use assets
- Lease liabilities

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(iii) Going concern

As of 30 September 2020, the Group's accumulated losses amounted to approximately EGP 18.9 billion (31 December 2019: EGP 17.2 billion) and the Group's current liabilities exceeded its current assets by EGP 23.9 billion (31 December 2019: EGP 18.8 billion). The Group has made a net loss of approximately EGP 6.2 billion for the nine months period ended 30 September 2020 (30 September 2019: EGP 440 million loss). In addition, the Group is also in breach of its existing debt covenants and some of the subsidiaries have defaulted in settling loan instalments on their due dates. Loans, including interest, amounting to EGP 6.9 billion where default has occurred which makes this amount repayable on demand, have been classified as current liabilities as at 30 September 2020. These circumstances indicate significant doubts as to whether the Group will be able to meet its debt obligations as they fall due and continue its operations without a significant curtailment.

These matters indicate the existence of a material uncertainty that may cast significant doubt about the Group's ability to continue as a going concern.

Management have prepared a comprehensive cash flow forecast for the next 5 years resulting from the following management actions that will be implemented and some of these are already in an advanced completion stage. Furthermore, management forecasted increase in cash inflows from revenue operating activities as resulted from:

- Egyptian Refinery Company "ERC" is operating at 100% capacity utilization and has been classified as an asset at the beginning of January 2020 and has delivered a staggering EGP 16 billion in revenue.
- TAQA Arabia has also diversified its energy portfolio through the Benban solar energy project that commenced its operation in Q1 2019, which strengthened the Group's cash inflows. Further, TAQA is strengthening its market position through new openings that enhance its dominant position as major supplier for long-term strategic services under secured long-term contracts.
- Management has strategic capital transactions initiatives that will generate cash inflows through local and foreign investors, for the Energy operating segment which lies under strategic long-term secured customer contracts and other intangible assets.
- Implementing a restructuring and reorganisation plan for non-core assets which includes the disposal of non-core investments and assets. This is expected to contribute approximately EGP 500 million as cash proceeds from the disposals.
- Increase in the operational cash inflows in agricultural, printing and transportation operating segments resulting from management actions in place to restructure and reduce the fixed and variable costs, which will strengthen the management financial position.
- Management has reached advanced stages of negotiations over the restructuring of debts at the holding level and at a number of its subsidiaries, Loans of approximately EGP 5 billion included currently within current liabilities are anticipated to be restructured onto a longer term basis and negotiations are underway in this regard with the lenders. The interest on these borrowings is expected to be serviced through the net cash savings resulting from the actions described above.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

With the expected cash flows from the above strategic initiatives and debt restructuring plans, management is confident that sufficient cash flows will be generated to meet loans and debt obligations as they fall due and continue the operations of the Group without significant curtailment. Accordingly, the consolidated interim financial statements of the Group have been prepared on a going concern basis.

(iv) Classification of assets and liabilities

The Group presents its assets and liabilities in the consolidated statement of financial position based on current/ non-current classification. The asset is classified as current when it is:

- * Expected to be realised or intended to be sold or used in normal operating course;
- * Held primarily for trading.
- * Expected to be realised within 12 months after the end of the reporting period, or
- * Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

The liability is classified as current when:

- * It is expected to be settled in normal operating course;
- * Held primarily for trading.
- * Expected to be realised within 12 months after the end of the reporting period, or
- * The entity does not have an unconditional right to defer the settlement of the liability for at least twelve months after the end of the reporting period.

The Group classifies all other liabilities as non-current. Deferred tax assets and liabilities are classified as non-current.

(v) New and amended standards adopted by the Group

The Group applied the following standards, amendments and interpretations for the first time to its annual report as of 1 January 2020:

- EAS (38) - "Employees benefits" - Amended to introduce new measurement rules to account for amendment, curtailment or settlement to benefit plans.; The Group was not affected by this amendment.
- EAS (42) "Consolidated financial statements" - Amended to introduce definition of investment entity and provided exception from consolidating particular subsidiaries for investment entities. The Group was not affected by this amendment.
- EAS (47) - "Financial instruments" - The standard includes new classification and measurement method categories of financial assets that reflect the business model in order to manage the assets and the characteristics of its cash flows.
- EAS (48) - "Revenue from Contracts with Customers" - This standard establishes a comprehensive concept framework by determining the amount and timing of revenue recognition.
- EAS (49) - "Leases" - Second Phase - The standard relates to lease arrangements other than finance leases (operating leases)

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

1. EAS 47 Financial Instruments – Impact of adoption

EAS 47 replaces the provisions of EAS 26 that relate to the recognition, classification and measurement of financial assets and financial liabilities, derecognition of financial instruments, impairment of financial assets and hedge accounting.

The adoption of EAS 47 Financial Instruments from 1 January 2020 resulted in changes in accounting policies and adjustments to the amounts recognised in the financial statements.

A. Classification and measurement

On 1 January 2020 (the date of initial application of EAS 47), the Group's management has assessed which business models apply to the financial assets held by the Group and has classified its financial instruments into the appropriate EAS 47 categories.

B. Derivatives and hedging activities

Impact from the adoption of EAS 47 on prior periods

The interest rate swaps in place as at 31 December 2019 qualified as cash flow hedges under EAS47. The Group's risk management strategies and hedge documentation are aligned with the requirements of EAS47 and these relationships are therefore treated as continuing hedges.

C. Impairment of financial assets

The Group was required to revise its impairment methodology under EAS 47 for its financial assets. The impact of the change in impairment methodology on the Group's retained earnings and equity is disclosed in the table in note 29 (a-v) above.

While cash and cash equivalents are also subject to the impairment requirements of EAS 47.

The Group applies the EAS 47 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all financial assets.

The loss allowances increased by 139,193 EGP for the financial assets during the nine months to 30 September 2020. under the incurred loss model of EAS 26. Note 29 (a-v) provides for details about the allowance.

2. EAS 48- Revenue from Contracts with Customers – Impact of adoption

The Group has adopted EAS 48 Revenue from Contracts with Customers from 1 January 2020 which resulted in changes in accounting policies and adjustments to the amounts recognised in the financial statements. In accordance with the transition provisions in EAS 48, the Group has adopted the new rules using Cumulative Effect Method.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

3. EAS 49 - Leases – Impact of adoption

The Group has applied First Phase of EAS (49) in relation to finance lease arrangements in 2019. The Second Phase of EAS (49) relates to lease arrangements other than finance leases (operating leases) and is applied from 1 January 2020.

A. Adjustments recognised on adoption of EAS 49

On adoption of EAS 49, the Group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of EAS 20 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2020. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 1 January 2020 was 13.7%

Right-of use assets were measured at the amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the balance sheet as at 1 January 2020. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application.

(i) Practical expedients applied

In applying EAS 49 for the first time, the Group has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics
- reliance on previous assessments on whether leases are onerous
- the accounting for operating leases with a remaining lease term of less than 12 months as at 1 January 2020 as short-term leases
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application, and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

The Group has also elected not to reassess whether a contract is or contains a lease at the date of initial application. Instead, for contracts entered into before the transition date the Group relied on its assessment made applying EAS 20.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(b) Principles of consolidation and equity accounting

(i) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Acquisition method

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- fair values of the assets transferred
- liabilities incurred to the former owners of the acquired business
- equity interests issued by the Group
- fair value of any asset or liability resulting from a contingent consideration arrangement, and
- fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Acquisition-related costs are expensed as incurred.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value, with changes in fair value recognised in profit or loss.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date. Any gains or losses arising from such re-measurement are recognised within statement of profit or loss.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

Changes in ownership interests held within controlling interests

When the ratio of equity held within controlling interests changes, the Group changes the amounts recorded for controlling and non-controlling shares to reflect such changes in the relevant shares in the subsidiary. The Group recognises directly within the equity of the parent company any difference between the amount of changing the non-controlling shares and the fair value of the consideration paid or received.

Disposal of subsidiaries

When the Group ceases to have control, the Group recognises any retained investment in the company that was a subsidiary at its fair value at the date when control is lost, with the resultant change recognised as profit or loss attributable to the owners of the parent company.

Goodwill

Goodwill arises on the acquisition of subsidiaries and represents the excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired, and contingent liabilities at the date of acquisition. If the consideration transferred, non-controlling interest in the acquiree and the date of acquisition fair value of the Group's equity previously held at the acquiree is less than the net of the identifiable acquired assets and liabilities assumed at the date of acquisition, the Group recognises the resulting gain is directly recognized in consolidated statement of profit or loss at the date of acquisition and the gains are attributed to the parent shareholders.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the Group's CGUs, or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored inside the Group at the operating segments level.

The Group undertakes impairment reviews of goodwill acquired in a business combination annually by comparing the CGU carrying amount including goodwill with its recoverable amount, which is the higher of fair value less costs of sale and value in use. The Group recognises any impairment loss immediately in profit or loss, and is not subsequently reversed.

Measurement period

The measurement period is the year required for the Group to obtain the information needed for initial measurement of the items resulting from the acquisition of the subsidiary, and does not exceed one year from the date of acquisition. In case the Group obtains new information during the measurement period relative to the acquisition, amendment is made retrospectively for the amounts recognised at the date of acquisition.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(ii) Associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting (see (iii) below), after initially being recognised at cost.

(iii) Equity method

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment.

Changes in ownership interest

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the reduction rate of the amount of profit or loss previously recognised in other comprehensive income is reclassified to profit or loss when relevant assets or liabilities are disposed of.

Losses of equity-accounted investment

When the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, the Group ceases to recognise its share in further losses. Once the Group's share is reduced to zero, further losses are recognised but only to the extent of incurred legal or constructive obligations or made payments on behalf of the other entity. When those companies realise profits in subsequent years, the Group resumes to recognise its share in those profits, but only after its share of profits equals its share in unrecognised losses.

Transactions with equity-accounted investment

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity-accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

Goodwill resulting from investment in equity-accounted entities

The excess of the total transferred consideration over the Group's share in the net fair value for the acquired determinable assets and assumed liabilities at the date of acquisition is recognised as goodwill. The goodwill resulting from contribution in associates is recognised within the cost of investment in the entity net of the accumulated impairment losses in the investment value of associates and is not be recognised separately.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

Impairment of equity-accounted investment

Investments in associates are assessed for impairment where indicators of impairment are present. The recoverable amount of an investment in an associate is the higher of value in use or fair value less costs of disposal and is assessed separately for each associate. Any resulting impairment loss is not allocated against the notional goodwill and purchase price allocation, but against the investment as a whole. Therefore, any reversal of the conditions led to recognising the impairment losses will be recognised to the extent in which the recoverable amount subsequently increases, provided it does not exceed the impairment losses previously recognised.

29(c) Foreign currency transactions

(i) Functional and presentation currency

The financial statements of each of the Group's entities are measured and presented using the currency of the primary economic environment in which the entity operate ('the functional currency'). The consolidated financial statements are presented in thousand Egyptian Pounds, which is the Group's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates, are generally recognised in profit or loss. They are deferred in equity if they relate to qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation.

Foreign exchange gains and losses that relate to borrowings are presented in the statement of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the statement of profit or loss on a net basis within other gains/(losses).

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss, and translation differences on non-monetary assets such as equities classified as at fair value through other comprehensive income are recognised in other comprehensive income.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(iii) Group companies

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each statement of profit or loss and statement of comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions), and
- all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

(iv) Financial reporting in Hyperinflationary Economies

The Sudanese and South Sudanese economies have been classified as hyperinflationary. The Egyptian Accounting Standards do not address financial reporting in hyper-inflationary economies. Therefore, the Group applied IAS 29 "Financial reporting in hyper-inflationary economies", under which the financial statement of Takamul for Cement Company have been expressed in terms of the measuring unit current at the reporting date.

The carrying amounts of non-monetary assets and liabilities are adjusted to reflect the change in the general price index from the date of acquisition to the end of the reporting period. Gains or losses on the net monetary position are recognised in profit or loss.

An impairment loss is recognised in profit or loss if the restated consolidated amount of a non-monetary item exceeds its estimated recoverable amount.

All items recognised in the consolidated statement of profit or loss are restated by applying the change in the general price index from the dates when the items of income and expenses were initially earned or incurred.

The application of the restatement procedures of IAS 29 have the effect of amending certain of the accounting policies, which are used in the preparation of the consolidated interim financial statements under historical cost convention. The amended policies include:

- Fixed assets.
- Project under construction.
- Inventories.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(d) Fixed assets

The Group applies the cost model at measurement of fixed assets. All fixed assets are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

The depreciation methods and periods used by the group are disclosed in Note 7a(i)

The Group reviews the residual value of fixed assets and estimated useful lives of fixed assets at the end of each fiscal year, and adjusted when expectations differ from previous estimates.

The carrying amount of the fixed asset is reduced to the recoverable amount, if the recoverable amount of an asset is less than its carrying amount. This reduction is considered as a loss resulting from impairment.

Gains or losses on the disposal of an item of fixed assets from the books are determined based on the difference between the net proceeds from the disposal of the item and the net book value of the item, and the gain or loss resulting from the disposal of fixed assets is included in the consolidated statement of profit or loss.

29(e) Intangible assets

(i) Goodwill

Goodwill is measured as described in [note 29\(b\)](#). Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, being the operating segments [\(note 9\)](#).

(ii) Trademarks, licenses and customer contracts

Separately acquired trademarks and licences are shown at historical cost. Trademarks, licenses and customer contracts acquired in a business combination are recognised at fair value at the acquisition date. They have a finite useful life and are subsequently carried at cost less accumulated amortisation and impairment losses. (trademarks have indefinite useful life)

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(iii) Computer software

Costs associated with maintaining software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the group are recognised as intangible assets when the following criteria are met:

- it is technically feasible to complete the software so that it will be available for use;
- management intends to complete the software and use or sell it;
- there is an ability to use or sell the software;
- it can be demonstrated how the software will generate probable future economic benefits;
- adequate technical, financial and other resources to complete the development and to use or sell the software are available; and
- the expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software include employee costs and an appropriate portion of relevant overheads.

Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is ready for use.

(iv) Research and development

Research expenditure and development expenditure that do not meet the criteria above are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

(v) Amortisation methods and periods

Refer to [note 7\(c\)\(i\)](#) for details about amortisation methods and periods used by the group for intangible assets.

29(f) Biological assets

Biological assets are measured at fair value less cost to sell. Cost to sell include the incremental selling costs, including auctioneers' fees, commission paid to brokers and dealers, and estimated costs of transport to the market but excludes finance costs and income taxes.

Cattles held for slaughter are classified as immature until they are ready for slaughter. Livestock are classified as current assets if they are to be sold within one year.

The fruit gardens and orchards growing on the trees are accounted for as biological assets until the point of harvest. Harvested Fruits are transferred to inventory at fair value less cost to sell when harvested.

Change in fair value of livestock and fruit gardens and orchards on trees are recognized in the statement of profit or loss.

Farming cost such as feeding, labour cost, pasture maintenance, veterinary services and sheering are expensed as incurred. The cost of purchase of cows plus transportation charges are capitalized as part of biological assets.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(g) Impairment of non-financial assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired.

Other non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units).

Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. Impairment losses recognised in prior years are reversed when there is an indication that such losses no longer exist or have decreased. Reversal of loss of impairment should not exceed the carrying amount that would have been determined (net of depreciation). Such reversal is recognised in the statement of profit or loss.

29(h) Non-current assets (or disposal groups) held for sale and discontinued operations

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, and financial assets that are carried at fair value, which are specifically exempt from this requirement.

An impairment loss is recognised for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the noncurrent asset (or disposal group) is recognised at the date of derecognition.

Non-current assets (including those that are part of a disposal group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single coordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit or loss.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(i) Inventories

Inventories are measured at the lower of cost and net realisable value. Cost is determined using weighted average method. The cost comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity, that are incurred by the Group in bringing the inventories to their present location and condition, but excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and any other costs necessary to complete the sale. The amount of any write-down of inventories to net realisable value and all losses of inventories shall be recognised as an expense in the period when the write-down or loss occurs

29(j) Investments and other financial assets

(i) Classification

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI, or through profit or loss), and
- Those to be measured at amortized cost. The Group's financial asset at amortized cost comprise of trade receivables, other debit balances and treasury bills.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The group reclassifies debt investments when and only when its business model for managing those assets changes.

(ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(iii) Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

(I) Debt instruments

Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

- **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses), together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.
- **FVOCI:** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of profit or loss.
- **FVPL:** Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

(II) Equity instruments

The Group subsequently measures all equity investments at fair value. Where the group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognized in other gains/(losses) in the statement of profit or loss as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(iv) Impairment

From 1 January 2020, the group assesses on a forward-looking basis the expected credit losses associated with its debt instruments carried at amortized cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade receivables, the group applies the simplified approach permitted by EAS 47, which requires expected lifetime losses to be recognized from initial recognition of the receivables.

(v) Accounting policies applied until 31 December 2019

(i) Classification

The Group classifies its financial assets in the following categories:

- financial assets at fair value through profit or loss,
- loans and receivables,
- available-for-sale financial assets.

The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling or re-purchase in the short-term or as the part of a specified managed financial instruments portfolio. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if expected to be recovered within 12 months from the date of the end of financial period.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Financial assets included in such group are presented as current asset if expected to be recovered within 12 months from the date of the end of the period. The Group's loans and receivables comprise 'Trade receivables and other debit balances' and 'Due from related parties' and 'cash and cash equivalents' in the statement of financial position.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives assets that are designated in this category and not classified as loans and receivables or held to maturity financial assets or financial assets at fair value through profit or loss. They are included in non-current assets unless the investment matures or management intends to dispose of it within 12 months of the end of the reporting period. If so, they are classified within current assets.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

When securities classified as available-for-sale are sold, the accumulated fair value adjustments recognised in other comprehensive income are reclassified to profit or loss as gains and losses from investment securities.

(iii) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Loans and receivables are subsequently carried at amortised cost using the effective interest method.

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Gains or losses arising from changes in the fair value are recognised as follows:

- for 'financial assets at fair value through profit or loss' – in profit or loss within 'other operating income / (expenses)'.
- for available-for-sale financial assets that are monetary securities denominated in a foreign currency – translation differences related to changes in the amortised cost of the security are recognised in profit or loss and other changes in the carrying amount are recognised in other comprehensive income
- for other monetary and non-monetary securities classified as available-for-sale – in other comprehensive income.

(iv) Impairment

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator that the assets are impaired.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

Assets carried at amortised cost

For loans and receivables, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in profit or loss. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Group may measure impairment on the basis of an instrument's fair value using an observable market price.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in profit or loss.

Assets classified as available-for-sale

If there is objective evidence of impairment for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss – is removed from equity and recognised in profit or loss.

Impairment losses on equity instruments that were recognised in profit or loss are not reversed through profit or loss in a subsequent period.

If the fair value of a debt instrument classified as available-for-sale increases in a subsequent period and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through profit or loss.

(v) Income recognition

Interest income

Interest income from financial assets at fair value through profit or loss, available-for-sale securities and loans and receivables is included in 'finance income/ (costs) – net'.

Interest income is recognised using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

Dividends income

Dividends on financial assets at fair value through profit or loss and available-for-sale equity instruments are recognised in profit or loss as part of revenue from continuing operations when the Group's right to receive payments is established.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(k) Offsetting financial asset and liability

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and the Group has an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default of the counterparty, and should reflect the Group's normal practices and requirements of financial requirements and other conditions related to the considerations of the risk and timing of the Group's cash flows.

29(l) Derivatives and hedging activities

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value at the end of each reporting period. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates derivatives as hedges of a particular risk associated with a recognised asset or liability or a highly probable forecast transaction (cash flow hedge).

The Group documents at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

The fair values of various derivative instruments used for hedging purposes as well as movements on the hedging reserve in other comprehensive income are disclosed in [note 8\(c\)](#). The full fair value of a hedging derivative is classified as a non-current asset or non-current liability when the remaining maturity of the hedged item is more than 12 months and as a current asset or current liability when the remaining maturity of the hedged item is less than 12 months. Trading derivatives, if any, are classified as a current asset or current liability.

Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated in reserves in equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss within 'other gains/ (losses) – net'.

Amounts accumulated in equity relating to the effective portion of interest rate swaps hedging variable rate borrowings are recognized in the consolidated statement of profit or loss within 'finance costs'.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognized when the previously hedged item or forecast transaction is ultimately recognized in the statement of profit or loss. When a hedged item expires or terminated or when a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the consolidated statement of profit or loss within 'other gains/(losses) – net'.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(m) Financial guarantee contracts

Financial guarantee contracts are recognised as a financial liability at the time the guarantee is issued. The liability is initially measured at fair value and subsequently at the higher of the amount determined in accordance with EAS 28 "Provisions, contingent liabilities and contingent assets" and the amount initially recognised less cumulative amortisation, where appropriate.

The fair value of financial guarantees is determined as the present value of the difference in net cash flows between the contractual payments under the debt instrument and the payments that would be required without the guarantee, or the estimated amount that would be payable to a third party for assuming the obligations.

Where guarantees in relation to loans or other payables of associates are provided for no compensation, the fair values are accounted for as contributions and recognised as part of the cost of the investment.

29(n) Trade receivables

Trade receivables are amounts due from the Group's customers for merchandise sold or services performed in the Group's ordinary course of business. If collection is expected within 12 months from the date of the financial statements or in the Group's normal operating cycle of the business, they are classified as current assets. Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment (See [note 29\(j\)](#) for further information about the Group's accounting for trade receivables).

29(o) Cash and cash equivalents

In the consolidated statement of cash flows, cash and cash equivalents includes cash in hand and with banks, deposits held at call with banks, other short-term investments with original maturities of not more than three months from the date of placement that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

29(p) Capital

Ordinary shares are classified within equity. Share premium, if any, are added to legal reserve to the extent of half of the issued capital, and the remaining balance of the premium is transferred to a special reserve, after deducting the shares issuance expenses (net of any advantage related to their income taxes) from the amount of share premium.

Where any Group company repurchases the Company's equity instruments (treasury shares), the consideration paid or received in exchange for those instruments, including any directly attributable incremental transaction costs (net of income tax) is deducted from the equity attributable to the owners of Citadel Capital Company as treasury shares until the shares are cancelled or reissued. Where such ordinary shares are subsequently reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the owners of Citadel Capital Company.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(q) Preferred shares

The Company's non –redeemable preferred shares are classified as equity, because they bear discretionary voting power only, do not contain any obligations to deliver cash or other financial assets and do not require settlement in a variable number of the Group's equity instruments.

29(r) Income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge for the period is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company and its subsidiaries and associates operate and generate taxable income. Management annually evaluates tax positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in foreign operations where the company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and where the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(s) Employees' benefits

(i) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the consolidated statement of financial position.

(ii) Pension obligations

The Group pays contributions to publicly administered pension insurance plans on a mandatory basis in the countries it operates. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due and as such are included in staff costs. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

(iii) Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits at the earlier of the following dates: (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for a restructuring that is within the scope of EAS 28 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are initially measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

(iv) Employees' share in legally defined profits

In accordance with EAS (38) "Employees Benefits" and Company's articles of association, the Group recognises the employees' share in cash dividends as deduction from equity in a similar manner to dividends paid to the Group owners, and as liabilities when the shareholders of the company approve the dividends in their General Assembly Meeting. The Group does not record any liabilities for the employees' share of undistributed profits.

29(t) Leases

(i) Finance lease

As explained in [note 29\(a\)\(v\)](#) above, the Group has changed its accounting policy for finance leases where the Group is the lessee. The new policy and the impact of the change are described in [note 29\(a\)\(v\)](#).

Until 31 December 2019, leases within the scope of law 95 of 1995, lease costs including maintenance expense of leased assets are recognised in the statement of profit or loss in the year they are incurred. When the Group decided to exercise the right to purchase the leased item, the cost of the right to purchase was capitalised as a fixed asset, which is depreciated over the useful life of the expected remaining life of the asset in the same method followed with similar assets.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(ii) Operating lease

Leases in which the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are recognised as expense in the consolidated statement of profit or loss on a straight-line basis over the period of the lease.

29(u) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any noncash assets transferred or liabilities assumed, is recognised in profit or loss as other income or finance costs.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer the settlement of the liability for at least 12 months after the date of the consolidated interim financial statements.

29(v) Borrowing costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. The Group recognises other borrowing costs as expenses in the year the Group incurs such costs.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(w) Shareholders reserve

Loans provided to Egyptian General Petroleum Corporation (EGPC) to purchase shares in Egyptian Refining Company (ERC), a wholly owned subsidiary, are deducted from equity and accounted for as an equity-settled share based payment.

The fair value of option granted to EGPC is recognised as a share-based payment with a corresponding increase in equity. The total amount to be expensed is determined by reference to the fair value of the options granted and the option issued to EGPC vests immediately.

29(x) Provisions, contingent liabilities and contingent assets

(i) Provisions

Provisions are recognised when the Group has a present (legal or constructive) obligation as a result of past events; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

The Group recognises the commitments required for restructuring and not related to the Group's effective activities within the costs of the provision of restructure.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Where the impact of the time value of money is significant, the amount of the provision is the present value of expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense in the statement of profit or loss.

(ii) Contingent liabilities

Contingent obligation is a present obligation that arose due to past events, and was not recognised because it was not expected to have an outflow of resources embodying economic benefits to settle the obligation, or the amount could not be reliably estimated. Instead the Group disclosed its contingent liabilities in its note to the consolidated interim financial statements.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

(iii) Contingent assets

A contingent asset is a possible asset that may arise from past events because of occurring or non-occurring of contingent future events that are not under the Group control. The Group recognises the contingent assets in the statement of financial position when the realisation of the relevant revenue is certain. Contingent assets are disclosed only when there is a possibility of inflow of economic benefits.

If some or all of the expenditure required to settle a provision is expected to be reimbursed by another party outside the Group, the reimbursement should be recognised as a separate asset in the statement of financial position, when, and only when, it is virtually certain that reimbursement will be received if the Group settles the obligation. The amount recognised should not exceed the amount of the provision.

29(y) Trade payables

Trade payables are recognised initially at the amount of goods or services received from others, whether they received invoices or not. When they are material, goods and services received, as well as the trade payables are recognised at the present value of the cash outflow expected by using interest rate of similar loans. Trade payables are then carried at amortised cost using the effective interest rate.

29(z) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Group's Chief Operating Decision-Maker (CODM). The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Management Board, consisting:

Ahmed Heikal Chairman & Founder	Hisham El-Khazindar Co-Founder & Managing Director	Moataz Farouk Chief Financial Officer
Tarek Salah Managing Director, Head of Cement	Karim Sadek Board Member, Head of Transportation & Logistics	

The Management Board convenes on a quarterly basis, or more frequently if needed, and is responsible for reviewing, amending, and endorsing the subsidiary companies' financial performance and overall strategy.

The management board assesses the performance of the operating segments based on the total revenues / the operating profit / the total assets of segment / the total liabilities and equity of segment. This measurement basis excludes discontinued operations. Interest income and expenditure are allocated to segments, as this type of activity is driven by the Group's head office, which manages the cash flows and liquidity requirements.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(aa) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable for goods sold or service rendered within the Group's normal course of business. Amounts disclosed as revenue are net of returns, trade allowances, rebates and amounts collected on behalf of third parties.

The Group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the Group and specific criteria have been met for each of the Group's activities as described below. The amount of revenue is not considered accurately measurable unless all cases of uncertainty regarding the possibility of the collection of the amount due are excluded. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

(i) Sales of goods

Revenue is recognised from the sale of goods to traders or contractors who have the right to sell them and determine their prices when the goods are delivered to them.

Sales are recognised when control of the products has transferred, being when the products are delivered to the traders or contractors, the traders or contractors have full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the traders or contractor's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the traders or contractors, and either the traders or contractors have accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the group has objective evidence that all criteria for acceptance have been satisfied.

Revenue from these sales is recognized based on the price specified in the contract, net of the estimated volume discounts. Accumulated experience is used to estimate and provide for the discounts, based on actual volume, and revenue is only recognized to the extent that it is highly probable that a significant reversal will not occur. A contract liability is recognized for expected volume discounts payable to customers in relation to sales made until the end of the reporting period. No element of financing is deemed present as the sales are made with a credit term of 90 days, which is consistent with market practice. A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

(ii) Rendering of services

Revenue resulting from services rendered is recognised in the related year when the execution of the transaction can be measured at the end of the reporting period on the basis of services performed to date in relation to the total services to be performed.

29(bb) Government grant

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions. Government grants are recognised under other income in the statement of profit or loss.

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant accounting policies (continued)

29(cc) Dividends

Dividends are recognised as liabilities in the consolidated interim financial statements for the amount of any dividend declared, being appropriately authorised by the Company's General Assembly of Shareholders and no longer at the discretion of the Group, on or before the end of the reporting period but not distributed at the end of the reporting period.

29(dd) Earnings per share

(i) Basic earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to owners of the Company, excluding any costs of servicing equity other than ordinary shares
- by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year and excluding treasury shares (Note 22).

(ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares, and
- the weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares.

30) Significant Events

The Group has indirect investments in Rift Valley Railways (Kenya) Limited "RVRK" and Rift Valley Railways (Uganda) Limited "RVRU" through its subsidiaries Africa Railways Limited "ARL", Ambience Ventures Limited and Kenya Uganda Railways Holding Limited "KURH" and Rift Valley Railways "RVR". ARL is the parent of the underlying subsidiaries RVRK, RVRU, AVL and KURH.

Since 2011, RVRK and RVRU had been operating two railway concessions by virtue of 25 years signed concession agreements between both companies and the governments of Kenya and Uganda respectively.

During July 2017 and January 2018, the courts and governments of Kenya and Uganda issued separate adjudications and orders to terminate the two concession agreements and, as a result, the Governments of Kenya and Uganda terminated their respective concession agreements due to default in payment of concession fees, rent and non-compliance with other key performance indicators. In accordance with the terms of the concession agreements, the respective Governments took over the assets of RVRK and RVRU. Accordingly, the Group management recognised an impairment for the entire carrying amount of the assets relating to both RVRK and RVRU amounting to EGP 3.25 billion within the consolidated financial statements for the year ended 31 December 2017.

**CITADEL CAPITAL COMPANY S.A.E.
AND ITS SUBSIDIARIES**
CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE NINE
MONTHS ENDED 30 SEPTEMBER 2020

**Notes to the consolidated interim financial statements
For the nine months period ended 30 September 2020**

(All amounts in the notes are shown in Thousand Egyptian Pounds unless otherwise stated)

Summary of significant events (continued)

During January 2018, and after the Government of Uganda's decision to terminate the concession agreement, the Group's management concluded that they had, at that point, lost any future economic benefit from the freight railways services which was the sole purpose of RVRK and RVRU.

Accordingly, RVRK and RVRU were forced to cease to operate and the Group lost control over the freight railways business as well as the power to control the entities. Related to this, Group management has been unable to obtain the financial information and accounting records for both companies as of 31 December 2018 and 31 December 2019.

On 3 December 2018 ex-employees of ARL filed a legal case against Africa Railways Limited for settlement of their dues. The Court has suo-motto issued notice to ARL to respond to the legal case. The parent entities could not represent ARL in the court in response to the order and indicated that the Company did not have sufficient funds to meet its obligation.

As a result, on 18 March 2019, an application to appoint a liquidator over ARL was filed. The company is considered insolvent and not able to pay its debts owed to ex-employees. Whilst these actions only occurred during 2019, Group's management are of the view that loss of control occurred prior to 31 December 2018 as the statutory demand conditions were invoked.

In accordance with paragraph no. 25 of the Egyptian Accounting Standard no. 42, and as a result of loss of control over the railways concession, Group management deconsolidated those entities during the year ended 31 December 2018 which resulted in a gain recognized in the consolidated statement of profit or loss of EGP 3.9 billion in that year, as set out in the table below.

Furthermore, the loan agreements and related finance documents entered into between the subsidiaries of ARL and its financiers indicated that on deconsolidation there would be no further recourse to Citadel Capital as a legal entity. Accordingly, Citadel had not provided for any financial guarantees or other credit enhancements, having remained in compliance with all conditions of the financing documents.

Deconsolidation of ARL gain recognised during the year ended 31 December 2018 as follows:

	31 December 2018
Liabilities related to subsidiaries derecognised – ARL and KURH	3,867,343
Liabilities related to subsidiaries derecognised – RVRK and RVRU	1,166,642
Liabilities related to subsidiaries derecognised – ARLL	276,265
Release of the translation reserve	(863,427)
Non-controlling interest derecognized	(483,422)
	3,963,401
