Energy

The Energy Industry is Supported by Strong Macro Fundamentals

Region-wide, trends are towards higher consumption of natural gas coupled with an increasingly unreliable supply

The region's energy-intensive industries are in need of reliable, quality fuel. Interest in the use of alternative fuels is rising, as are government incentives for the same

Electricity price increases in Egypt will necessitate a number of energy efficiency projects and greenfield power projects

The Government of Egypt is in the process of cutting back on fuel subsidies and deregulating the energy sector

Qalaa's energy plays that capitalize on these trends: *ERC; TAQA Arabia*

Energy at Qalaa Holdings

- To keep pace with projected economic growth and provide much-needed energy capacity in the region, Qalaa Holdings has invested in energy as one of our core industries.
- Two core subsidiaries: Egyptian Refining Company and TAQA Arabia.

Mining

Company Overview

From quarrying for the cement industry to the manufacture of world-class technical calcium carbonate and environmentally friendly building materials, Qalaa Holdings' approach in the mining sector focuses on investing in the entire value chain helping nations develop and obtain value from their natural resources.

Core platform ASCOM includes several operating companies

ASCOM (leading provider of quarrying materials for the cement industry, including high-grade limestone, glass sand, and clay)

ASCOM for Chemicals & Carbonates Manufacturing (ACCM, focused on the production of world-class ground technical calcium carbonate)

ASCOM Precious Metals "APM" (currently has an asset base of a 1.6 million OZ gold reserve in Western Ethiopia)

Mining Sector Footprint

Subsidiaries ACCM (technical calcium carbonate) and GlassRock (glasswool and rockwool insulation) are promising export plays

APM holds highly promising gold concessions in Ethiopia at the prefeasibility study phase with significant proven shallow reserves

ACCM is diversifying its sales channels, placing greater emphasis on the local market. This will position the company to hedge against foreign exchange risk and allow it to benefit from the local market's increasingly favourable fundamentals

Company Overview

Qalaa Holdings' investments in agrifoods aim to overcome challenges facing the agricultural and food production sector in Egypt and the region. Through its subsidiary, Gozour, the Group operates Dina Farms and ICDP (Dina Farms' fresh dairy producer).

Rising prices of imported skimmed milk powder (SMP) drive higher demand for fresh milk

ICDP (the distributor of Dina Farms fresh products) is the leading market player with c.75% of fresh milk (short shelf-life) products market in Egypt

At Dina Farms, management had been implementing multiple initiatives aimed at enhancing its manufacturing capabilities and increasing efficiency

This strategy led to improved performances across all of Dina Farms' divisions and recorded a top line increase of 13% y-o-y to EGP 343.0 million in 2Q22

Company Overview

Nile Logistics is a leading logistics service provider in Egypt, and South Sudan, using river transportation and sea-port services as its backbone operations.

Nile Logistics

Owns and operates a barge fleet in Egypt that covers river transport routes from Alexandria and Damietta to Aswan.

The service started to gain more traction following the removal of fuel subsidies as transporting goods on the Nile is cheaper and more efficient than trucking and railway.

The company currently has three pushers and eight barges in service, bringing Nile Barges' entire fleet into operation.

Footprint

The business' upside potential in Egypt

- Coal handling and storage in Alexandria and the Tanash port in Cairo
- Container handling and storage in Alexandria (Inland Container Depot)
- Grain handling and storage in Alexandria
- Fuel-efficient river barges used for the transportation of cargo along the Nile

Storage

At the company's facilities, customers have access to storage facilities which allow for the safekeeping of various types of products. The company offers:

Coal storage facilities

Inland container depot with reefers – for products which require storage at refrigerated temperatures commenced operations in August 2016

The company's grain storage warehouse at Nubareya commenced operations in October 2019

In July 2020, the depot was connected to the national electricity grid as opposed to the previous reliance on diesel generators

Inland container depot at Nubareya (near Alex port)

Coal storage near Alex port

Grain Storage Warehouse (GSW) – Nubareya, Alexandria Port

The grain storage warehouse handled 35k tons in 2Q22, a 60% y-o-y decline compared to the 87k tons handled in 2Q21. The warehouse's performance has declined following lower demand for grain storage due to supply chain shortages resulting from the Russo-Ukrainian conflict. The company has changed the warehouse usage to a general goods warehouse in response to lower demand for grain storage.

The information contained herein must be treated in a confidential manner and may not be reproduced, used or disclosed, in whole or in part for any other purpose, without the prior written consent of Qalaa Holdings. Each prospective investor and/or shareholder accepting this Presentation agrees to return it promptly upon request.

In considering investment performance information contained in this Presentation, prospective investors and/or shareholders should bear in mind that past performance is not necessarily indicative of future results and there can be no assurance that Qalaa Holdings will achieve comparable results, that diversification or asset allocations will be met or that Qalaa Holdings will be able to implement its investment strategy and investment approach or achieve its investment objective. Unless otherwise indicated, all internal rates of return are presented on a "gross" basis (i.e., they do not reflect the management fees, carried interest, taxes, transaction costs and other expenses to be borne by investors in Qalaa Holdings, which in the aggregate are expected to be substantial). Prospective investors and/or shareholders may, upon request, obtain an illustration of the effect of such fees, expenses and other charges on such returns. Actual returns on unrealised investments will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, legal and contractual restrictions on transfer that may limit liquidity, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the valuations used in the prior performance data contained herein are based. Accordingly, the actual realised returns on unrealised investments may differ materially from the returns indicated herein. There can be no assurance that "pending" investments described herein will be completed.

Statements contained in this Presentation that are not historical facts are based on current expectations, estimates, projections, opinions and beliefs of the Qalaa Holdings. Such statements involve known and unknown risks, uncertainties and other factors, and undue reliance should not be placed thereon. Actual events or results or the actual performance of Qalaa Holdings may differ materially from those reflected or contemplated in such targets or forward-looking statements. The performance of Qalaa Holdings is subject to risks and uncertainties.

Certain information contained herein (including targets, forward-looking statements, economic and market information and portfolio company data) has been obtained from published sources and/or prepared by third parties (including portfolio companies) and in certain cases has not been updated through the date hereof.
