Review report on separate interim financial statements

To the Board of Directors of Contact Financial Holding (S.A.E)

Introduction

We have reviewed the accompanying separate interim statement of financial position of Contact Financial Holding an Egyptian joint stock company as of 30 September 2024, and the related separate interim statements of income, comprehensive income, cash flows and changes in equity for the nine-months period then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of these interim financial statements in accordance with the Egyptian Accounting Standards. Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of Review

We conducted our review in accordance with Egyptian Standard on Review Engagements (2410), "Review of Interim Financial Statements Performed by the Independent Auditor of the Entity." A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters in the company and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these separate interim financial statements.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying separate interim financial statements do not present fairly, in all material respects, the separate financial position as of 30 September 2024, and of its separate financial performance and cash flows for the nine-months period then ended in accordance with the Egyptian Accounting Standards.

Contact financial holding (S.A.E)
Notes to the Separate financial statements.
For the Nine Months ended at 30 September 2024

1- An overview of the company and its activities

- Sarwa Capital Holding for Financial Investments (S.A.E) - an Egyptian joint stock company - Sarwa Capital Consulting Company (previously) was established pursuant to Law No. 159 for year 1981 and its executive regulations amended by Law No. 3 for year 1998, the legal entity of the company changed from being subjected to law No. 159 for year 1981 to be subject to the provisions of Capital Market Law No.95 for year 1992 based on the decision of the Extraordinary General Assembly held on June 12, 2017 and it was registered in the Commercial Register under No. 37933 - (Giza) - on March 30, 2009.
- Amendment was made to the commercial register of the company under number 78317 on March 18, 2018 – Cairo
- The purpose of the company is to participate in the establishment of companies that issue securities or to increase their capital and the promotion and underwriting in financial securities, the provisions of applicable laws, regulations and decisions. It is required to obtain the necessary license to practice these activities, and the company may have an interest or participate. In any way, with financial companies that engage in businesses similar to their businesses or that may help them achieve their purpose in Egypt or abroad. They may also merge with, purchase, or annex these companies in accordance with the provisions of the law and its executive regulations.
- The Company's name was changed according to the decision of the Extraordinary General Assembly Meeting held on June 12, 2017 to become "Sarwa Capital Holding for Financial Investments" and annotation was made to this effect in the commercial register of the company under No. 78317 and change on March 18, 2018.
- The Company's name changed pursuant to the resolution of the Extraordinary General Assembly Meeting held on February 15, 2021, to become "Contact Financial Holding". and annotation was made to this effect in the commercial register of the company under No. 78317 and change on March 28, 2021.
- The duration of the company is 25 years starting from the date of registration in the Commercial Register.
- The company's headquarters are at 7 Champollion Street - Cairo.

2- Basis of Preparation of financial statements

- The Board of Directors approved the issuance of the translated separate financial statements on 14 November 2024.

3- Functional and Presentation Currency

- These separate financial statements are presented in Egyptian Pound.

4- Use of Judgments and Estimates

- The preparation of the separate financial statements in conformity with Egyptian Accounting Standards requires Management to make professional judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, revenues, and expenses. The estimates and assumptions are based on historical experience and other various factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

- The Judgments and Estimates are reviewed Annually. Review of estimates are recognized prospectively.
- Changes to accounting estimates are recognized in the period in which the estimate changes if the change affects only that period or in the period of the change or future periods if the change affects both current and future periods.

Expected credit loss

- The accounting estimates and judgments related to the impairment of Financial Assets is a critical accounting estimate because the underlying assumptions used can change from period to period and may significantly affect the entity's results of operations.
- In assessing assets for impairments, the management's judgment is required particularly in projecting future economic information and scenarios where circumstances of economic and financial uncertainty exist as developments and changes to expected cash flows can occur both faster and with less predictability. The actual amount of the future cash flows and their timing may differ from the estimates used by management and consequently may cause actual losses that differ from reported allowances.

5- Fair value measurement

A. Valuation Models

The entity measures fair values using the following fair value hierarchy which reflects the significance of the inputs used in making the measurements.

- **Level 1:** Inputs that are quoted market prices (unadjusted) in active markets for identical instruments.
- **Level 2:** Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are
- **Level 3:** Inputs that are unobservable (which the entity minimizes its use as much as possible). This category includes all instruments for which the valuation technique includes inputs that are not observable, and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation techniques include net present value and discounted cash flow models comparison with similar instruments for which observable market prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates credit spreads and other premiums used in estimating discount rates security prices and foreign currency exchange rates.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset at the measurement date.

The availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

For more complex instruments the entity uses in-house valuation models. Some or all the significant inputs into these models may not be observable in the market and may be derived from market prices or rates or estimated based on assumptions. Examples of instruments involving significant unobservable inputs include certain instruments for which there is no active market. Valuation models that employ significant unobservable inputs require a degree of management judgement and estimation in the determination of fair value. Management

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

judgement and estimation are usually required for the selection of the appropriate valuation model to be used the determination of the probability of counterparty default and prepayments and selection of appropriate discount rates.

Fair value estimates obtained from models are adjusted for any other factors such as liquidity risk or model uncertainties; to the extent that the entity believes that a third-party market participant would take them into account in pricing a transaction. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the entity and the counterparty when appropriate.

Model inputs and values are calibrated against historical data and published forecasts and where possible against current or recent observed transactions in different instruments and against market quotes. This calibration process is inherently subjective, and it yields ranges of possible inputs and estimates of fair value. Management uses judgement to select the most appropriate point in the range.

- . According to the Company's articles of association 5% of annual net profit is transferred to the legal reserve and this reserve shall be stopped when its balance reaches 50% of the issued capital according to the decision of the ordinary general assembly meeting. This reserve was stopped due to the company's reaches to 50% of the issued capital.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

22-2 Share premium reserve

- The company's capital was increased on April 14, 2016, April 5, 2017, November 5, 2018, May 9, 2019, and October 3, 2019 which resulted in share premium reserve as follows:

	Description
Share premium reserve as of December 31 2015	-
No. of increase in shares	1 750 161 Shares
Value of increase in capital	17 501 610 EGP
Share premium amount	28 780 324 EGP
Share premium reserve as of December 31 2016	28 780 324 EGP
No. of increase in shares	968 378 Shares
Value of increase in capital	9 683 780 EGP
Share premium amount	35 486 386 EGP
Share premium reserve as of December 31 2017	64 266 710 EGP
No. of increase in shares	95 108 696 Shares
Value of increase in capital	15 217 391 EGP
Share premium amount	684 782 612 EGP
Share premium reserve as of December 31 2018	749 049 322 EGP
No. of increase in shares	476 865 304 Shares
Value of increase in capital	76 298 449 EGP
Share premium ESOP	1 359 820 EGP
Share premium reserve as of December 31 2019	750 409 142 EGP
Share premium ESOP	16 181 340 EGP
Share premium reserve as of December 31 2020	766 590 482 EGP
Share premium ESOP	23 889 133 EGP
Share premium reserve as of December 31 2021	790 479 615 EGP
Share premium ESOP	29 756 037 EGP
Share premium reserve as of December 31 2022	820 235 652 EGP
Share premium ESOP	14 103 118 EGP
Share premium reserve as of December 31 2023	834 338 770 EGP
Share premium ESOP	10 716 169 EGP
Share premium reserve as of September 30 2024	845 054 939 EGP

According to law No.159 for year 1981 and its executive regulations the amount of share premium is to be added to the legal reserve of the company up to reaching 50% of the issuance capital. Any excess is recognized as a special reserve and cannot be distributed as dividends.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

23- Tax position

First: Corporate income tax

- Tax returns of the company were submitted for the years since the inception of the business activity till 2023 on the due dates according to law No. 91 for year 2005.
- Years 2015-2016: the company was accounted by estimation, and was appealed on at the legal dates, and waiting for the reinspection session for these years.
- Years 2018-2019: the company was accounted by estimation, and was appealed on at the legal dates, and waiting for the reinspection session for these years.

Second: Salary tax

- The Company regularly settles the tax pay on the legal due dates and preparation of the data required for inspection is in process.

Third: Stamp tax

- The inspection was completed until 2016 and the due tax differences were paid.
- Currently preparing the inspection for the years 2017/2018.

24- legal position

Ongoing lawsuits

- Lawsuit No. 2064 of 2019 Circuit 5 Economic filed by Mrs. Jacqueline Nabil Atallah Gabriel against Contact Financial Holding Company, the subject is a claim for compensation for a difference in the share price amounted to 1,259,591 EGP (one million, two hundred and fifty-nine thousand, five hundred and ninety-one Egyptian pounds) On July 27, 2020, the lawsuit was dismissed, and the judgment was appealed by appeal No. 534 of 12, session of January 17, 2022, and the second and third respondent was ordered to be obligated and compensated, and the applications against the company were rejected, and a cassation was filed against the judgment from the second respondent company, and it was registered No. 6202 of 92, and its session has not yet been set.

25- Objectives and Policies of Financial Risks Management

- The company's financial instruments are represented in cash balances and equivalents, customers, credit banks, suppliers and items of a monetary nature within the balances of debtors and creditors.
- The company is exposed to a number of risks associated with the exercise of its activities, which are summarized as follows:

Financial Risk Management Objectives and Policies

- This disclosure presents information about to the extent to which the entity is subject to the following risks resulting from using the financial instruments the entity's goals policies and operations regarding the measurement and management of such risks and the entity's capital management as well.
- The entity's board of director is responsible for setting the framework for the risk management process and its monitoring. The entity's top management is the responsible for setting and monitoring the risk management policies and submitting reports to the parent company.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

- The internal audit committee monitor the compliance of the entity's top management with policies and procedures adopted for the financial risk management process and the adequacy of the current policies and procedures to the expected financial risks.

(A) Credit Risk

- Credit risks are the financial losses incurred by the Company in the event that customer or the counterparty do not fulfill a or his/its obligations under of the terms and conditions of the financial instruments contract.
- The entity mainly faces credit risks from clients' receivables notes receivable sundry debtors other debit balances dues from related parties as well as its financing activities including deposits at banks and financial institutions.

Receivables Balances

- The credit risk is managed through the entity's policies procedures and control structure related to risk management. As the credit worthiness is being measured for each client separately through conducting field survey to assure good reputation and credit worthiness of client and his ability to repay all his financial liabilities. The credit limit is determined according to this evaluation. The client's outstanding accounts are monitored on continuous basis. Impairment study is conducted at the financial position date.
- As for the financial assets that are considered to be credit-impaired the ECL provision covers the amount of loss expected to be incurred by the entity. The evaluation of ECLs is carried out on a case-by-case basis for non-homogeneous portfolios or through applying portfolio-based standards in respect of individual financial assets in these portfolios via the entity's ECL Model for homogeneous portfolios.
- Future economic forecasts are to be considered while calculating ECLs. The lifetime expected losses are estimated based on the probability-weighted present value in respect of the difference between the contractual cash flows that are due to the entity under the contract; and the cash flows that the entity expects to receive.

Amount arising from expected credit loss (ECL)

Inputs Assumptions and Techniques used for estimating.

- When determining whether the risk of default in payment pertaining to a financial instrument increased significantly since initial recognition the entity considers reasonable and supportable information that is relevant available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the entity's historical experience and experts credit assessment submitted as a kind of forward-looking information.
- The company's management considered that there is no need to make statistical models to calculate the expected credit losses by analyzing historical data or determining the material increase in risk, as the company's management will be more conservative in terms of the formation of the necessary provisions. Accordingly, the company's management has covered the credit risk of these companies by 100% provisions, so that these companies do not have any expected credit risks.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

(B) Liquidity Risk

- The liquidity risk is represented in the factors that could affect the ability of the entity to repay all or part of its liabilities at the maturity date and in accordance with the company's policy, appropriate liquidity is maintained to meet the company's current liabilities, which affects the minimization of that risk.

(C) Foreign currency risk

- Foreign currency risk arising due to changes in foreign currency exchange rates which affect payments and receipts in foreign currencies as well as the valuation of foreign currency assets and liabilities and for the purposes of minimize that risk, the company takes into consideration to balance between foreign currency assets and liabilities.

(D) Interest risk

- This risk arising due to changing interest rates that may have an impact on business results, and the company's management works to obtain the best conditions available in the market for banking facilities and periodically reviews the prevailing interest rates in addition to fixing interest rates on the used portion from the loans.

26 - Bases of Measurements

- The separate financial statements are prepared on a historical cost basis except for financial instruments that are measured at fair value amortized cost or cost as appropriate.
- Investments in subsidiaries and associate are presented at cost, which represents the company's ownership and not on the basis of the business results or net assets of the investee companies. The financial statements provide a more comprehensive understanding of the financial position, business results and cash flows of the Company and its subsidiaries (the Company).

27 -Significant accounting policies

- The accounting policies described below have been applied consistently during the periods presented in these financial statements.

27 – 1 Lease contracts

- The Company has applied Egyptian Accounting Standard No. (49) retroactively and therefore the comparative information has not been restated and to be disclosed in accordance with Egyptian Accounting Standard No. (20). Details of accounting policies in accordance with Egyptian Accounting Standard No. (20) are disclosed independently.
- At the beginning of the contract, the entity assesses whether the contract is a lease or includes a lease. The contract is a lease or includes a lease if the contract transfers the right of control to use a specified asset for a period of time in return for consideration. To assess whether the lease contract transfers the right of control over the use of a specified asset. The company uses the definition of the lease contract in Egyptian Accounting Standard No. (49). This policy applies to contracts concluded on or after January 1, 2021

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

As a lessee

- At commencement or on modification of a contract that contains a lease component, the entity allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the entity has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component. The entity recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.
- The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the entity by the end of the lease term or the cost of the right-of-use asset reflects that the entity will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is annually reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.
- The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the entity's incremental borrowing rate. Generally, the entity uses its incremental borrowing rate as the discount rate.
- The entity determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments.
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date.
- amounts expected to be payable under a residual value guarantee.
- The exercise price under a purchase option that the entity is reasonably certain to exercise, lease payments in an optional renewal year if the entity is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the entity is reasonably certain not to terminate early.
- The lease liability is measured at amortized cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the entity's estimate of the amount expected to be payable under a residual value guarantee, if the entity changes its assessment of whether it will exercise a purchase, extension, or termination option or if there is a revised in-substance fixed lease payment.
- When the lease liability is premeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The entity presents right-of-use assets that do not meet the definition of investment property in 'fixed assets and lease liabilities in 'loans and borrowings' in the statement of financial position.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

Short-term leases and leases of low-value assets

- The entity has elected not to recognize right-of-use assets and lease liabilities for leases of low – value assets and short-term leases, including IT equipment.
- The entity recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

27 – 2 Foreign Currencies

Foreign Currency Transactions

- Foreign currency transactions are translated in the Company's dealing currency at the exchange rate on the dates of transactions.
- Assets and liabilities of a monetary nature in foreign currency are translated into the currency of exchange at the date of the financial statements.
- Assets and liabilities measured at fair value in foreign currency are translated into the exchange rate used when determining fair value.
- Assets and liabilities of a non-monetary nature measured at historical cost in foreign currency are translated into the exchange rate on the date of the transaction.
- Currency differences generally in profits or losses are recognized, With the exception of currency differences resulting from the translation of what is recognized in other comprehensive income items:
 - * Available-for-sale investments in equity instruments (excluding impairment, where currency differences and other comprehensive income items are reclassified to profit or loss).
 - * Financial obligations that have been allocated as a risk hedging instrument to cover the risk of net investment in foreign activity as long as the coverage is effective.
 - * Hedging instruments used at risk of cash flows as long as hedging is effective.

27 – 3 Revenue recognition

The entity recognizes revenue under Standard No. (48) Revenue from Contracts with Customers using the following five steps model:

Step 1: Identify the contract with customer	A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.
Step 2: Identify the performance obligations	A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.
Step 3: Determine the transaction price.	The transaction price is the amount of consideration to which the entity expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.
Step 4: Allocation of transaction price.	For a contract that has more than one performance obligation, the entity allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the entity expects to be entitled in exchange for satisfying each performance obligation.
Step 5: Revenue recognition	The entity recognizes revenue (or as) it satisfies a performance obligation by transferring a promised good or service to the customer under a contract.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

Credit interest

-Credit interest is recognized in the income statement using the Effective Interest Rate Method.

Dividend's income

-Revenues from dividends resulting from entity investments are recognized on income statement on the date on which the right of the company to collect the value of these profits arises.

27 – 4 Financial instruments

Classification and Measurement

The entity determines the nature of the business model by considering the way in which the financial assets are managed to achieve the business objective as determined by management.

At initial recognition financial assets have been classified and measured according to:

- Amortized cost
- Fair value through other comprehensive income. (FVTOCI) and
- Fair value through profit or loss (FVTPL).

The financial assets have been classified according to how they are managed (the entity's business model) and their contractual cash flow characteristics.

Subsequent Measurement

A financial asset is classified as subsequently measured at: amortized cost fair value through other comprehensive income (FVOCI) or (FVTPL) on the basis of both the entity's business model for managing the financial asset and the contractual cash flows characteristics of the financial asset.

-A debt instrument is measured at amortized cost if it meets both of the following conditions:

- The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- A debt instrument is measured at FVOCI only if it meets both of the following conditions:

- The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
 - The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- All other debt instruments assets will be classified as fair value through profit or loss.

Financial assets are not reclassified subsequent to their initial recognition unless the entity changes its business model for managing financial assets in which case all affected financial assets are reclassified on the first day of the first reporting year following the change in the business model.

The entity may irrevocably elect to measure equity investment which is not classified as trading investments to be as a fair value through other comprehensive income at initial recognition. And this choice will be made on an instruments-by-instruments basis.

- All other equity instruments will be classified as fair value through profit or loss.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

In addition to that the entity may irrevocably elect to designate a financial asset that will be measured at fair value through other comprehensive income to be measured at fair value through profit or loss in the initial recognition if in such a case this reclassification will lead to prevent accounting mismatch.

Business Model Assessment

The entity assesses the objective of a business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice specially to know whether these management policies concentrate to gain the contractual interest or reconcile financial assets year with the financial liabilities year which finance these assets or target cash flow from selling the assets.
- How the performance of the portfolio is evaluated and reported to the entity's management.
- The risks that affect the performance of the business model and the financial assets held within that business model and how those risks are managed.
- The frequency, volume, and timing of sales in prior years the reasons for such sales and its expectations about future sales activity.

Meanwhile the scope of the entity is not limited to the information related to sales activity separately but the overall assessment of how the goal that was announced by the entity to manage financial assets can be achieved as well as how to realize cash flow must be considered.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at fair value through profit or loss because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Assessment of whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular year of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs) as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest the entity considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or the amount of contractual cash flows such that it would not meet this condition.

Financial assets – Subsequent measurement, gains and losses

Financial assets at FVTPL: These assets are subsequently measured at fair value. Net gains and losses including any interest or dividend income are recognized in profit or loss.

Financial assets at amortised cost: These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

Debt investments at FVOCI: These assets are subsequently measured at fair value. Interest income calculated using the effective interest method foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On derecognition gains and losses accumulated in OCI are reclassified to profit or loss.

Equity investments at FVOCI: These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses including any interest expense are recognized in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign xchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

Derecognition

Financial assets

The entity derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the entity neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The entity could enter transactions whereby it transfers assets recognized in its statement of financial position but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

Financial liabilities

The entity derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire. The entity also derecognizes a financial liability when its terms are modified, and the cash flows of the modified liability are substantially different in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred, or liabilities assumed) is recognized in profit or loss.

Impairment

The entity applies both the general and simplified approaches to measure expected credit loss on financial assets that are recognized at amortized cost and debt instruments that are recognized at fair value through other comprehensive income. The financial assets can transfer between three stages according to changes in credit quality since initial recognition.

Impairment losses on financial assets are recognized in the Consolidated Income Statement within the credit losses expenses.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

Simplified approach model

With regards to trade receivables balances related to fees and commission the simplified approach model for determining the impairment is performed in two steps:

- Any trade receivable in default is individually assessed for impairment; and
- A general reserve is recognized for all other trade receivables (including those not past due) based on the determined historical loss rates and carry forward losses expectations.

General approach model

The general model impairment requirements of EAS No. (47) apply to all credit exposures that are measured at amortized cost or FVOCI except the positions covered by simplified model as above mentioned.

For purposes of the impairment policy below these instruments are referred to as ("Financial Assets").

The determination of impairment losses and allowance moves from an incurred credit loss model whereby credit losses are recognized when a defined loss event occurs under previous accounting standard to an expected credit loss model under EAS No. (47) where allowances are taken upon initial recognition of the Financial Asset based on expectations of potential credit losses at the time of initial recognition.

EAS No. (47) introduces a three-stage approach to impairment for Financial Assets that are not credit-impaired at the date of origination or purchase. This approach is summarized as follows:

Stage 1: 12 months expected credit loss:

Stage (1) includes financial assets on initial recognition and that do not have a significant increase in credit risk since the initial recognition or that have low credit risk. For these assets expected credit loss is recognized on the gross carrying amount of the asset based on the expected credit losses. For these assets expected credit loss is a result of default events that are possible within 12 months after the reporting date.

Stage 2: Lifetime expected credit loss - not credit impaired:

Stage (2) includes financial assets that have had a significant increase in credit risk since initial recognition but those do not have objective evidence of impairment. For these assets' lifetime expected credit loss is recognized but interest is still calculated on the gross carrying amount of the asset. Lifetime expected credit loss are the expected credit losses that result from all possible default events over the expected life of the financial instrument.

Stage 3: Lifetime expected credit loss - credit impaired:

Stage (3) includes financial assets that have objective evidence of impairment at the reporting date. For these assets' lifetime expected credit losses are recognized.

Non-financial assets

-At the end of each financial period, the Company revise the book values of the non-financial assets of the Company to determine whether there is an indicator of impairment. If so, the company makes an estimate of the residual value of the asset.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

-To perform an impairment test for an asset, the assets are grouped together into the smallest asset group that includes the asset that generates cash inflows from continuous use and is largely independent of cash inflows from other assets or asset groups - cash generating units. The goodwill generated upon consolidation of the works is distributed to the units that generate cash or the groups of these units with the acquiring company and expected to benefit from the consolidation process.

-The residual value of the asset or the unit generating cash is its fair value less the costs of selling or its use value, whichever is greater, the use value of the asset is the present value of future cash flows expected to occur discounted at a discount rate before tax, which reflects current market estimates of the time value of money and the specific risk of the asset or cash generating unit.

-Impairment loss is recognized if the carrying amount of the asset or unit generating cash is greater than its residual value.

-Impairment loss in profits or losses is recognized. It is distributed first to reduce the book value of goodwill distributed to the cash generation unit, and then reduce the other assets of the unit proportionally based on the book value of each asset in the unit.

-The loss due to the impairment of goodwill is not reversed in a later period. For other assets, impairment losses are reversed to the extent that they do not exceed the book value that would have been determined (in net after depreciation and depreciation) unless the impairment loss is recognized relative to the asset in previous years.

27 – 5 Capital

Ordinary shares

-Incremental costs directly attributable to the issuance of ordinary shares are recognized as a deduction from equity. Income tax relating to transaction costs of an equity transaction are accounted for in accordance with EAS No. (24) “Income Tax”.

27 – 6 Provisions

-Provisions are recognized when the entity has a present obligation (legal or constructive) as a result of past events and that it is probable that an outflow of economic resources will be required to settle the obligation the costs to settle related obligations are probable and a reliable estimate is made of the amount of the obligation. The provisions balances are revised at the financial position date and is adjusted when it is necessary to present best estimate of these provisions.

-The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date taking into account the risks and uncertainties surrounding the obligation.

27 – 7 Income tax

- The recognition of the current tax and deferred tax as income or expense in the profit or loss for the period except in cases in which the tax comes from process or event recognized - at the same time or in a different year - outside profit or loss whether in other comprehensive income or in equity directly or business combination.

Current income tax

- The recognition of the current tax for the current period and prior periods and that have not been paid as a liability but if the taxes have already been paid in the current period and prior periods in excess of the value payable for these years this increase is recognized as an asset. The current taxable liabilities (assets) for the current period and prior

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

periods measured at expected value paid to (recovered from) the tax authority using the current tax rates (and tax laws) or in the process to issuance in the end of the financial year. Dividends are subject to tax as part of the current tax assets and liabilities are not off settled only when certain conditions are met.

Deferred tax

- Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities of financial reporting purpose and the amounts used for taxation purposes.
- Deferred tax is recognized for all temporary difference except for:
 - Taxable temporary differences arising on the initial recognition of goodwill.
 - Temporary differences on the initial recognition of assets or liabilities in a transaction that is not:
 1. A business combination.
 2. And not affects neither accounting nor taxable profit nor loss.
 - Temporary differences related to investments in subsidiaries associates and joint arrangements to the extent that the entity is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.
- Deferred tax assets are recognized for unused tax losses unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on business plans for the entity. deferred tax assets are reassessed at each reporting date and recognized to the extent that it has become probable that future taxable profits will be available against which they can be used.
- Deferred tax is measured at the tax rates that are expected to be applied to temporary differences using current tax rate or future expecting rate.
- The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the entity expects at the reporting date to recover or settle the carrying amount of its assets and liabilities.
- Deferred tax assets and liabilities are offset only if certain criteria are met.

27 – 8 Receivables and other debit balances

- Receivables that do not include interest are recognized at face value less the value of the amounts expected not to be collected and estimated when the full amount is unlikely to be collected and the value of the debtors' balance is reduced by the value of bad debts when determined. Other debit balances are recognized at cost less impairment losses.

27 – 9 Creditors, accrued expenses and other credit balances.

- Creditors, accrued expenses and other credit balances are recognized at their cost.

27 – 10 Related Party Transactions

- Related parties are represented by subsidiaries companies, major shareholders, directors and top management of the company, and also represent companies controlled or subject to joint control or influence by those related parties, and netting contracts are approved at the ordinary general assembly.

Contact Financial Holding (S.A.E)

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

27 – 11 Legal reserve

- According to the company article of investment, the entity provide for deduction of a sum equals to at least 5% of the annual net profit for the formation of the legal reserves such deduction will be ceased when the total reserve reaches an amount equals to at least half of the entity's issuance capital. Once the reserve falls below this amount deduction shall resume.

27 – 12 Cash flows

- The statement of cash flows is prepared using the indirect method. For the purpose of preparing the cash flows cash and cash equivalents consists of cash on hand, bank current accounts demand deposit which not exceed three months. Bank overdraft balance "that is settled when it is required or considered part of company's cash management" is considered as items that presented as an item of cash for and for the purpose of preparing cash flow.

27 – 13 Financing expenses

- Financing expenses are charged as an expense during the financial period in which the company incurred such cost on the income statement on the date of maturity in accordance with the contract with the financing entities.

27 – 14 Expenses

- Operating expenses and other expenses necessary to carryout business operations for the company including general, administrative and selling expenses are with inclusion in the income statement in the fiscal year in which those expenses were realized.

27 – 15 Subsidiaries

- Subsidiaries are entities controlled by the group.
- The group controls an entity when it is exposed to or has rights to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
- The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

27 – 16 Investments accounted with equity method

- Group's interests in equity-accounted investees comprise interests in associates and a joint venture.
- Associates are those entities in which the group has significant influence but not control or joint control over the financial and operating policies.
- A joint venture is an arrangement in which the group has joint control whereby the group has rights to the net assets of the arrangement rather than rights to its assets and obligations for its liabilities.
- Interests in associates and the joint venture are accounted for using the equity method. They are initially recognized at cost which includes transaction costs.
- Subsequent to initial recognition the consolidated financial statements include the group's share of the profit or loss and other comprehensive income of equity accounted investees until the date on which significant influence or joint control ceases.

Notes to the Separate Financial Statements for the Nine months ended 30 September 2024

28 Significant events

- In light of the global and local economic conditions and the geopolitical risks facing the country, the government, mainly represented by the Central Bank of Egypt, took a package of financial measures during 2022 and 2023 to contain the impact of these crises and the resulting inflationary impact on the Egyptian economy, including the devaluation of the Egyptian pound against foreign currencies, raising the interest rate on overnight deposits and lending and setting maximum limits on cash withdrawals and deposits in banks. This resulted in a decrease in the exchange rates and availability of foreign currencies through official channels, which led to delays in the payment of debts in foreign currencies as well as higher purchase and payment costs.
- On March 6, 2024, the Central Bank OF Egypt issued a decision to raise the overnight deposit and lending rates by 600 basis points to 27.25% and 28.25%, respectively. The credit and debit rate was also raised by 600 basis points to 27.75%, while allowing the use of a flexible exchange rate to be determined according to market mechanisms. This led to an increase in the average official exchange rate of the US dollar during the first week of the CBE's decision, reaching between 49 and 50 EGP/USD.
